

# Precision, Elegance, Comfort: Synea.

Straight and contra-angle handpieces

synea

synea<sup>VISION</sup>

The instrument line for the highest demands. Customised straight and contra-angle handpieces with maximum precision, elegance and performance.

synea<sup>FUSION</sup>

The efficient and economical solution. Straight and contra-angle handpieces with the well-known Synea quality have never been so affordable!

# The new premium straight and contra-angle handpieces from W&H

People have Priority: To make it easier to select one of our new Synea straight and contra-angle handpieces, we listened to your requirements and have now developed two new lines perfectly suited to your needs.

Synea Vision: now with innovations such as special scratch-resistant coating, and Synea Fusion: a series with top quality and maximum economy.

## Quiet

Noticeably quieter – thanks to new gearing technology.

## Monoblock design

ergonomics cast from a single piece – for optimal hygiene.

## Customised production

Different head sizes for optimal access options.

## Reliability

Top quality for a long life.

## Two instrument lines

New! Synea is available in Vision and Fusion lines.

## Synea Vision Short Edition

The short route to better ergonomics.

# Synea Vision: the ultimate straight and contra-angle handpieces

A range for all applications: W&H has developed a range of top quality instruments with the new Synea Vision line. Two high-speed head sizes are available for surprising access options. And a special coating improves aesthetics even more – and extends their life.

## Instruments for the future

- > Different head sizes with 5x spray
- > Perfect ergonomics and quiet operation
- > Lasting quality
- > Scratch-resistant surface
- > Long service life

## Small heads

Two high-speed head sizes and the world's lowest head height among slow-speeds. Also ideal for patients with limited access.

## Scratch-resistant surface

A special coating resists signs of wear – for long-lasting aesthetics and pleasure equal to that experienced on the first day.

## 5x spray

The 5x spray ensures even cooling of the treatment site under all conditions.

## Excellent preparation results

with outstandingly quiet operation and optimised head sizes.

## Versatile range

The right straight or contra-angle handpiece for every application – in Synea quality!

## Synea Vision Short Edition: the perfect balance between power and ergonomics

The new Synea Vision Short Edition makes the treatment process considerably easier due to the reduction in weight and length. Choose from the classic range of high and slow-speeds. The perfect balance between ergonomics and power when combined with the new, ultra-short micromotor EM-12 L.

### Perfect balance

Fit perfectly in your hand: the contra-angle handpieces of the Short Edition.

### Small but what power

The new micromotor EM-12 L with LED for bright as daylight illumination of the treatment area.

### Contra-angle handpieces for all situations

The Synea Vision Short Edition in the classic range and with two different head sizes for high-speeds.

### Scratch-resistant surface

even on the small Synea Vision contra-angle handpieces.

### Best results

due to easy access and small head sizes.

The contra-angle handpieces of the Synea Vision Short Edition can be used on micromotors with an ISO coupling length of 23 mm or less. Please check compatibility with your existing micromotors. Your specialist consultant will be glad to assist you.

# Working with a system: The Synea Vision Standard and Short Edition

Two systems, lots of advantages: whether you go for the Synea Vision Standard Version or prefer the Synea Vision Short Edition – superb quality, durability and precision will make your daily work significantly easier.

## Synea Vision Short Edition with electric motor EM-12 LED\*

Small but what power: the EM-12 LED electric motor can be used both for restoration and prosthetics as well as endodontics and prophylaxis.

## Synea Vision standard contra-angle handpieces with EM-E8 LED electric motor

The perfect system for daily work in the practice. With instruments for all standard motors that are currently available on the market.

## 25% lighter, 15% shorter

The combination of Synea Vision Short Edition contra-angle handpieces with the EM-12 LED electric motor considerably reduces the amount of strength required.

synea VISION

### It's in your hands

Decide on the solution that best suits the most important tool in your practice – your hands.

\*Available on selected dental units.

# Synea Fusion: Ultimate price-performance ratio

synea FUSION

Proven Synea quality has never been so economical:  
With the Synea Fusion line W&H has developed a range  
of instruments in which economy is as important as quality.

synea FUSION

### Quality that pays for itself

- > Proven Synea quality
- > Maximum efficiency in use
- > Uncompromising user comfort

### Good illumination

Compact glass rod for good illumination of the treatment site.

### Optimal cooling from four sides

Continuous cooling with Quattro Spray.

### Small head

Best visibility and optimal access thanks to new small head sizes.

### Optimised grip profile

for secure grip and optimum hygiene.

### Special instruments

Special reciprocating contra-angle handpieces for areas that are difficult to access.

# Hygiene & maintenance of your straight and contra-angle handpieces and turbines

W&H Technical Service

»The better the care, the longer the pleasure.«  
Regular cleaning and care of your instruments protects them against premature wear and unnecessary service costs.

You can find the exact work process for preparation of transmission instruments and motors at [wh.com](http://wh.com).

## Sterilization in record time

**Cleaned, serviced, sterilized.** The Assistina 3x3 cleaning process, in combination with the Lisa fast cycle, reduces the overall preparation time. You can use the instruments again after only 19 minutes.

### Wipe disinfection

Disinfect the instruments before cleaning and servicing by wiping them.

### Cleaning and care

The Assistina 3x3 cleans and services three instruments inside and outside in just 6 minutes.

### Sterilization

With the Lisa fast cycle, the instruments can be removed from the sterilizer ready for use after only 13 minutes.

### Maintenance at the press of a button

The validation of the cleaning process is confirmed by expert opinion and can be viewed at [wh.com](http://wh.com).

### Assistina 3x2

The Assistina 3x2 prepares instruments in two stages: internal cleaning, lubrication.
