Message from the Director

Dear Doctor and Team,

Presidental is a service-based company focussed on assisting Dental, Medical and Veterinary clinics. Over the 31 years I have been servicing equipment, I know that it is important to have quality new equipment alternatives once equipment is no longer economical to repair. We service a range of equipment brands, however we believe A-dec to be the most reliable equipment on the market, and the best value for money. For this reason, we are proud to be NSW/ACT's A-dec exclusive equipment dealer.

Whilst the past 31 years have shaped who Presidental is today, the last few years have seen some exciting milestones and presented significant opportunities to grow.

We have listened to our growing customer-base, and invested heavily into the areas that are most valued by you. We hear clients say that they value reliable and responsive service, along with creative solutions to streamline expenses and minimise equipment downtime.

Recently both our Technical and Customer Service teams have doubled in size. We now have 12 full-time technicians, and a network of partner technicians in regional areas. We have also appointed an Operations Manager who has a proven track-record in increasing efficiency, maintaining quality, and ensuring growth of the business.

Unlike other equipment dealers, Presidental is committed to growing our team to ensure that we maintain our quality and reliable service. This is the difference between sales companies, and service companies. Sales companies want to increase their sales. Service companies are committed to sustainable growth, so that we can not only assist you now, but also well into the future.

We recently developed a new preventative maintenance offering called "Pres-Essential". Many fast growing multi-site clinics are now experiencing the benefits of streamlined equipment maintenance costs and improved cashflow with less risk.

We have exciting plans for 2019 and you can be confident that Presidental is continually looking at ways to add additional value and, to delight our customers. Put us to the test! Call us today and experience the Presidental difference!

Scott Donoghoe

Director, Presidental Pty Ltd

Dental Chair Annual Service from \$678

Just as your car benefits from an annual service, so will your chair!

A-dec Care is a 55 point check-up for your chair and includes replacement of listed serviceable components. Adhering to the 55 point list, one of our A-dec trained technicians will complete the full 55 point check in 2 hours.

Each day you will put your equipment to vigorous use providing treatment to your patients. Its many moving components will benefit from a regular preventative maintenance program, ensuring it continues to work when you want it to work.

With a view to maximising your equipment uptime, on completion the technician will provide a written report detailing any items deemed to require further attention.

For any Dentist that relies on equipment to perform at its best, all-day every day, a preventative maintenance and inspection plan is just as vital as regular dental check-ups on your teeth! Early detection of potential problems is key to minimising down-time.

Dear Doctor and Team,

In 2015 the national budget delivered good news for small business with a program for accelerated write-off of individual assets costing less than \$20,000 (excl GST).

Small business is defined as those with less than \$2,000,000 annual revenue. From July 1 2018 until June 30 2019, small businesses purchasing individual assets costing less than \$20,000 (excl GST) will qualify for an accelerated tax deductibility in the year in which they are purchased.

A \$19,999 spend would qualify for a \$5,699 tax reduction in the year of expenditure.

See below for a guide on accelerated depreciation amounts on some of our commonly sold equipment under the \$20,000 threshold - purchased on or after 1 July 2018, along with the net costs after tax in financial year 2018-19.

Products under the \$20,000 threshold	GST Exclusive Price	GST Inclusive Price	Depreciation Amount FY18, Purchased after 1 July 2017	Net Cost After Tax to Purchaser - 1 July 2018

TurboSMART B Suction unit (3-4 surgeries)	\$10,296	\$11,326	\$2,831	\$8,495

* Please speak with your accountant to see if the above applies to your specific circumstances.

If you would like to take advantage of the current small business tax benefits, please contact us on 1800 773 743 for a no-obligation quote. We can also arrange FREE product demonstrations on items such as handpieces, intra-oral cameras, operatory LED upgrades, PSPIX phosphorous plate scanner and the New Implantmed with integrated ISQ Osstell Module.

Warm regards,
Luke Williams, Sales & Marketing Manager

presidential

pres-essential

- ✓ Reduced Labour rates
- ✓ No callout fees
- ✓ Priority Service
- ✓ Streamline your cashflow with average costs charged monthly
- ✓ Ask us for more information!

Why Presidential?

- **Have you ever tallied up your yearly dental equipment maintenance bills?**
- **Is your equipment consistently running at optimal performance levels and always reliable?**
- **Do you currently have to deal with multiple service providers to maintain all the equipment in your clinic?**
- **Is your technician A-dec authorised/100% maintaining your A-dec warranties?**

Presidential offers you responsive and reliable service, with 10 technicians and 6 customer service staff, we are well positioned to service all of your dental equipment.

Our Sales and Customer Service team provide valuable insights and experience when it comes to sharing what works in dental clinics, and the common pitfalls that the buyer needs to navigate.

Presidential may not always offer the cheapest purchase price, but we will most definitely minimise the cost of ownership over a 5 year period – whilst some other cheaper suppliers cost you more after 5 years of maintenance costs.

Presidential is a trusted advisor to many doctors and clinics – ranging from single surgery operators to corporates listed on the Australian Stock Exchange that operate 7 days a week. We are equipped to grow with your business, and not only that, we will help you grow by providing insights to:

- **Minimise your operating costs**
- **Maximise your patient retention**
- **Streamline procedure efficiencies**
- **Reduce operator fatigue**
- **Keep abreast of regulatory changes and future proof your business**

The question really is, can you afford not to have Presidential looking after your business!

"Presidential has been supplying and maintaining our Dental Surgeries for over 25 years.

Throughout this time, we have invested in A-dec chairs and W & H Autoclaves. Our main priority in purchasing these items is reliability, and has proved a successful purchasing determiner over this extended period. Regular services is a must if unwanted downtime is to be avoided, for which Presidential has been instrumental in keeping our apparatuses operating to their maximum performance. Because of their service team being based nearby, it is reassuring that problems are often solved on site, and within a small timeframe.

As dentists, we are in the Care industry. Good equipment is paramount in delivering quality care. Our service is dependent on a good system, and having Presidential looking after our interests in terms of dental equipment, the delivery of good practice can be realised."

Dr Kent Driver, Dynamic Dental, Belmont

Treatment Consoles

Everything in its place and a place for everything. That's exactly what you get with the Preference Collection 5580 treatment console. With a redesigned midsection, we've streamlined the appearance and functionality. With the centre partition removed, we've opened up the usable space to accommodate a variety of larger ancillary devices. We've also increased the capacity of the wire chase making it easier to run cables or utilities through the cabinetry without cutting additional holes.

Think about how you work. What equipment do you use now, and what do you see yourself using in the future? Imagine yourself at your optimal performance. What does that look like? When creating a system that meets your specific needs, think about where you look for your equipment and what instinctively feels natural. With these considerations in mind, you'll be well on your way to creating a streamlined environment that works the way you do.

**Preference Collection
5580 treatment console
with soffit extension**

SWING-OUT SHELVES
Rotate toward the operator for
easy access to equipment.

ADJUSTABLE GLASS SHELVES
Accommodate different-sized
tubs, trays and cassettes.

Accessory Consoles

In a fixed or semi-walled floor plan, Preference Collection accessory consoles offer an abundance of storage, wash station, and delivery system options. Equipment and materials are well organised and easy to reach. The rounded and angled countertops allow clear access into the treatment room. Preference Collection upper storage and dispensing units keep cups, towels, and masks discreetly stored, creating a patient-friendly environment.

EQUIPMENT DRAWERS
Offer excellent access to
equipment and supplies.

Mini LED Australia Curing Light

- Emits light in the most efficient part of the spectrum
- Only 6 to 12 seconds to polymerize 2mm of any composite
- Choice of three modes for optimal curing of all types of composite - Fast mode, Pulse mode and Ramping mode.

\$1,741

SA-F02621

Mini LED Black Curing Light

- Cures 3 mm of any composite in 10 seconds
- Multi-fibered glass light guide
- Anodized aluminum handpiece
- Very high-performance single L.E.D. built into a patented optic module

\$1,260

SA-F05400

Mini LED ScanWave

Polymerization Modes

Bonding Modes

1. A pulse cycle of 12x5 seconds for a complete arch or indirect bonding
2. A continuous cycle of 5 seconds for clear and translucent bondings

Mode Scan

1. Full Scan, continuous cycle of 9 seconds. Universal mode for all types of materials regardless of the photo-initiator
2. Soft Scan, cycle of 20 seconds. Soft start of 5 seconds, then full power during 10 seconds and a soft ending of 5 seconds to avoid any thermal choc.

Laser target ring feature

\$3,650

SA-F05450

Mini LED Supercharged

The most powerful curing LED & the widest spectrum

- High power: 3 seconds curing light
- Wide spectrum: cure all composites
- Hygiene: no cross contamination
- Safety - no risk of pulpal damage

\$2,762

SA-F05214

Softly Amalgamator by Acteon

- Universal high-speed mixer for pre-dosed dental materials in capsules (amalgams, glass ionomers)
- Precise, controlled and consistent mixing
- Ergonomic design, easy to use
- Oscillating range 25mm
- Mixing frequency 4000 vibrations/min
- Extremely quiet and easy to maintain

\$1,082

SA-F03190

SOPROCARE

assistina 3X3 **NEW**

Clean inside, clean outside

Perfect cleaning inside and outside

The fully automatic Assistina 3x3 takes over the time-consuming process of preparing straight and contra-angle handpieces and turbines for sterilisation.

YOUR ADVANTAGES AT A GLANCE:

- Automatic internal cleaning
- Automatic external cleaning (3x3 model only)
- Lubrication of the transmission parts
- Short cycle time
- Easy to use
- Optimum price performance ratio

LISA VA Traceability

LisaSafe: No room for error

The traceability of your sterilisation protocol is becoming an ever-increasing requirement to ensure patient safety and to legally protect your practice. For this reason, W&H has innovated by developing LisaSafe, a comprehensive traceability concept that reduces unnecessary handling and avoids the risk of error.

Making the link

The aim of a traceability system is to link a medical device and a sterilisation cycle to the patient. To achieve this, sterilised loads need to be labelled with the following information:

- Steriliser serial number
- Cycle or number
- Sterilisation date
- Load expiry date

Net weight: 43 kg

A NEW ALL IN ONE waterproof glass keyboard – great for infection control

The new medical waterproof keyboard for all health professionals

- 3 modes of connectivity available – USB, RF and Bluetooth.
- Connect to PCs, tablets and smartphones.
- Keyboard supports Android, Windows and MAC OSX
- The numeric key pad can be switched to mouse pad mode.
- Keypad buttons have adjustable volume and vibration control
- Tempered glass surface is easily wiped over and cleaned

The Robert-Koch Institute states:

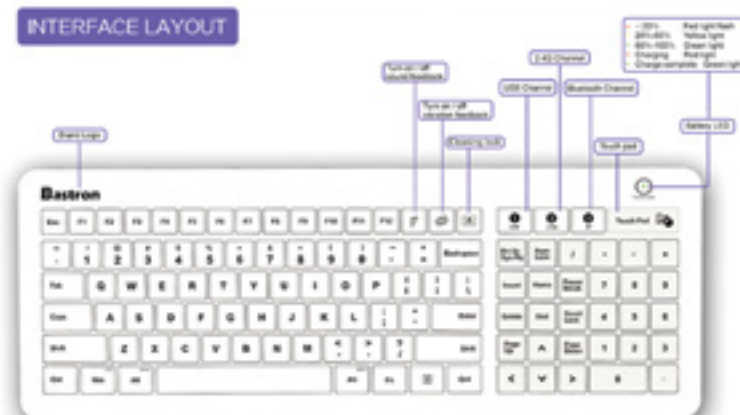

“Because of their mechanical construction, conventional keyboards cannot be disinfected.”

And recommends:

Keyboards with “smooth, liquid-proof and disinfectible surfaces” are recommended for hospitals and doctor’s offices.

How to Adjust and Wear Loupes

How to Choose Quality Loupes

The best method to evaluate loupes is to look at an object with straight black lines, as above Figure A. The most common signs of poor quality loupes are low resolution, chromatic aberration and spherical aberration.

Chromatic aberration refers to color distortion. Because each color has a different wavelength, uncorrected optics cause the various wavelengths to focus at different points in space. The first color that generally comes out of focus is blue; when looking at black lines on white paper, poor quality loupes will display a blue haze just to the side of the black lines, as depicted in Figure B. Spherical aberration is stated to be the flatness of the image.

When viewed through loupes, an object that exhibits spherical aberrations would appear to be curved or spherical, as depicted in Figure B. The lines would not be straight as they should be, as in the original (Fig. A) or as a Gritter loupe image example like Figure C.

A simple piece of graph paper, can best reveal the difference between mediocre and high quality loupes, better than complex objects like models. Other important considerations are light transmission, depth of field and field of view.

Light transmission is important not only for quality of the image, but also for the comfort and safety of your patients. Optimised light transmission means that you can work with less light, reducing your eyestrain while minimizing the exposure of your patient to bright light.

Depth of field is defined as the range that's in focus away from and towards you without moving your head. The ergonomic benefits, or how comfortable the loupes are to wear, of a large depth of field are clear because there is less need to move your back and neck to work effectively.

Field of view refers to the amount of the original object that you can see at one time. Different applications have different needs. A bigger field of view is not always the better choice; for instance, an endodontist might prefer to see only the area of focus, whereas a periodontist would like to see as much of the surrounding area as possible.

Interpupillary Adjustment

Interpupillary Adjustment. This adjustment is controlled by turning the interpupillary adjustment knob back and forth, until the image converges into a circle.

Adjust the hinge mechanism so that the optics are angled approximately 30 to 45 degrees below a horizontal line. This will allow for the user to look down into the optics while working, keeping an upright posture.

Most loupes have a preset working distance. Be sure to position yourself back and forth to find the optimal distance for your focusing. Adjust the head-band to wear them comfortably.

- 1** Basic treatment ANTI-SCRATCH protects against scratches and abrasions
*K Anti-scratch treatment.

- 3** ANTI-SCRATCH PLUS treatment
Constitutes a barrier against surface damage, it protects against scratches and abrasions. It is certified according to the requirement of EN166 "K".

- 2** Basic treatment ANTI-FOG that prevents the formation of condensation.
*N Anti-fog treatment.

- 4** ANTI-FOG PLUS treatment
It's a permanent treatment that prevents the formation of condensation. It is certified according to the requirement of EN166 "N".

- 5** UDC Univet Double Coating
The revolutionary coating created through UDC technology provides to your eyewear superior resistance from scratches and fogging for outstanding performance in any working condition. Deposition of coatings in separate processes on the surfaces of the lens:
- exclusive anti-fog coating inside the lens
- multilayer scratch-resistant coating outside the lens. Both treatments are permanent and assure the product has high superior performance as per EN 166 standards. This technology is expressed in Monoart® Stretch Orange glasses.

- 6** SOFTPAD technology
SoftPad is a patented terminal that has been added to the arm of the eyewear to offer comfort and protection. Thanks to the innovative use of materials and a meticulous design, the ergonomics of these glasses reach a new level of comfort, providing perfect stability to the safety glasses and full adaptability to the face of the user. In addition to the length adjustment in 3 positions, the SoftPad system has a further tilting movement that allows the device to fit perfectly to the user's head. The SoftPad system is supplied with the Monoart® Cube glasses Monoart® Cube Orange/Smoked glasses and Monoart® Stretch glasses.

Eyewear marking

Added to personal protective equipments (PPE) the marking guarantees respect of current safety regulations. Required by the law, the marking is added both on the lens, to identify scale number, manufacturer, optical class, mechanical resistance and optional requirements, and on the frame to identify manufacturer, reference normative and mechanical resistance.

European Normatives

EN 166 Personal eye-protection - Specifications / EN 167 Personal eye-protection
- Optical test methods EN 170 Personal eye-protection - Ultraviolet filters.

Addition of the CompoSMOOTH Brush & Application Insert Set

The CompoSMOOTH, a special silicon brush, allows an easy adaption and modelling of the composite surface before polymerisation. Even 'sticky' composite can be adapted in an optimal way. The perfect surface morphology is created by only slight pressure.

Set includes:

Code 19.200.00 CompoSMOOTH Brush Holder

\$66.90

CompoSMOOTH
THE SURFACE IS THE KEY...

For Extraction

Upgrade of Extration Forceps to RoBa edition

With the patented design, RoBa is the advancement of conventional extracting forceps with the advantages of a tapered deep grip. The modified beaks fit exactly on the teeth which ensures a maximum grip on the appliance. The new beaks are available for all figures in the upper and lower jaw.

The billow grind claws radially into the teeth and avoids a 'riding' between the tooth crown and the inner contour of the beak.

Concavely elaborated inner contours of the forceps beak fit in the convex tooth contour. With deep grip in the alveolus on the neck of the tooth or crown, RoBa ensures a parallel and maximum grip.

ZEPF

PATENTED

*This upgrade changes those Xcision Forceps marked * to RoBa type*

\$369

For Extraction

Addition of the Benex II Extraction System

In modern dentistry, Implantology following extraction is favoured.

Benex II provides gentle & simple extraction of roots over the whole mouth.

Damage to soft tissue and the surrounding bone is minimised.

Due to the longitudinal extraction method, Benex II provides the optimal base for directimplantation. It is also a valuable aid for retarded implantation after extraction

Benex II

Set includes:

Code 12.303.00 Benex II Set – Basic type

\$3,988

12.302.00

**Buy an extra
base adaptor
and save time**

Time Saving Hint...

If you have multiple brands of high speed (turbine) handpieces you can save time by purchasing a base adaptor for each coupling. This will enable you to switch between handpiece brands with ease.

**Ask us about
Handpiece
Servicing!**

Did you know that handpieces require regular servicing to maintain optimal performance? Just like the rest of your equipment, handpieces need to be on a maintenance schedule, and replaced every few years. If you are not getting optimal performance out of your handpieces, give us a call today and we can arrange to quote or assess your handpieces so that you won't have to put up with sub-performance any longer!

Scavenging Hoods and Tubing Sets

Axess Low Profile Nasal Hoods

The Axess low profile design provides unencumbered mouth access whilst its small lightweight scavenging tubing is easy to work around, enabling clinicians to deliver excellent efficient care to more patients.

Designed for the lightweight Axess autoclavable tubing set.

Clearview Nasal Hoods

Accutron's Clearview Scavenging Hood System incorporate a double hood with a transparent outer hood, allowing the **doctor to monitor the patient's breathing** for increased safety.

Combined with scented hoods, Clearview combined with NO₂ reduces patient anxiety for treatment.

Available to fit existing Tubing Sets - see below for Adapter Kits.

PIEZON[®] NO PAIN handpiece

EM-EN-061

PIEZON[®] NO PAIN LED handpiece

EM-EN-60

EMS Scaling Tips

A

EM-DS-001

For removing supragingival deposits in all quadrants

P

EM-DS-011

For removing supra- and subgingival calculus in all quadrants

PS

EM-DS-016

For removing calculus in deep periodontal pockets in all quadrants

B

EM-DS-003A

For cleaning lingual surfaces with heavy stain and calculus

C

EM-DS-002A

For removing deposits and stain – especially suitable for removing bonding residue, (e.g. in orthodontics)

EMS Scaler Handpiece Consumables

EMS Perio Kits

PL1

EM-DS-030

Left-curved instrument for periodontal debridement – especially suitable for difficult-to-reach interproximal surfaces

PL2

EM-DS-031

Same as PL1 instrument with a right curve

PL3

EM-DS-032

Instrument for cleaning and disinfecting periodontal pockets – especially suitable for follow-up and recall visits

PL4

EM-DS-030

Left-curved instrument with small ball (> 0.6-mm diameter) on instrument tip for the periodontal debridement of furcations and concavities

PL5

EM-DS-034

Same as PL4 instrument with right curve

Implant Maintenance

PI - Starter Kit
EM-FS-295

4 PI instruments, 1 file holder (120°) and
1 flat wrench

PI - Refill
EM-DT-065A

EMS Endodontic Tips

RT1

EM-DS-066A

Diamond-tipped instrument
for locating canals and
removing calcifications in
the coronal third of the root
canal system

RT2

EM-DS-067A

Diamond-tipped instrument
for removing ledges.
Creates straight canal for
easy viewing of broken
instruments

D

EM-DS-005A

For loosening crowns,
bridges and pins placed
previously with phosphate
cement

H

EM-DS-004A

For the lateral thermal
condensation of gutta-
percha

Flat Wrench

EM-DT-018

To change instruments for
all three file holders

180° File Holder

EM-DS-069A

For use with RT3, Berutti
and RE2 instruments

Diamond Tipped Instruments

HPL3

EM-DS-075A

70µm grain

Diamond-tipped instruments for
smoothing restoration overhangs

DPL3

EM-DS-065A

15µm grain

Diamond-tipped instruments for
smoothing restoration overhangs

EMS Endodontic Tips

120° File Holder

EM-DS-001A

For the flexibility to use
different endo files,
specially suited for anterior
and premolar areas. Also
suitable for RE2 and Berutti
instruments

90° File Holder

EM-DS-012A

For the flexibility to use
different endo files,
specially suited for the
molar area

RT3

EM-DT-062

Very long and fine
instrument for the removal
of broken instrument tips.
Use with 180° file holder
(5 pack)

RE2

EM-DT-061

Instrument for retrograde
root canal isthmus
preparation. The surface
is coated with nonabrasive
titanium nitride. Use with
120° or 180° file holders
(5 pack)

Berruti Instrument

EM-DT-060

Diamond-tipped instrument
for the retrograde
preparation of root
canals. A tapered design
allows minimally invasive
access and therefore
fewer postoperative
complications. Use with
120° or 180° file holders
(5 pack)

ESI - Starter Kit

EM-FS-279

Non-cutting NiTi
instrument for the
effective cleaning and
irrigation of the root canal
system (6 files)

ESI - Refill

EM-DT-069A

Non-cutting NiTi instrument
for the effective cleaning
and irrigation of the root
canal system (6 files)

Endo K-Type File Set

EM-DT-011

The root canal system (Use
files in 90° or 120° file
holders) K-Files for cleaning
and disinfecting

Endo K-Type Files
