SOPROCARE Intraoral Camera

The SOPROCARE concept was developed to assist the dental professional during prophylaxis and periodontal treatment in the dental office. SOPROCARE reveals caries in CARIO mode, as well as new and old dental plaque in PERIO mode. SOPROCARE is the first product on the market to reveal gingival inflammation. In DAYLIGHT mode, SOPROCARE can also be used as a camera, providing all of the necessary tools to perform a complete and time efficient oral examination.

**Under Perio mode,
it differentiates the
colour of tissue and
reveals old plaque
by a shade of yellow
and orange. Increase
patient acceptance
today and reveal
what they can't see
under the naked eye.**

DENTAL PLAQUE

The healthy teeth keep their original colour

The old plaque ranges from yellow to orange depending on its mineralization

INFLAMMATION

A severe gingival inflammation is indicated by bright and voluminous magenta-red areas
