Message from the Director

Dear Doctor and Team,

Presidental is a Full service company focussed on assisting Dental, Medical and Veterinary clinics. Over the 33 years I have been servicing equipment, I know that it is important to have quality new equipment alternatives once equipment is no longer economical to repair. We service a range of equipment brands, however we believe A-dec to be the most reliable equipment on the market, and the best value for money. For this reason, we are proud to be NSW/ACT's A-dec exclusive equipment dealer.

Whilst the past 33 years have shaped who Presidental is today, the last few years have seen some exciting milestones and presented significant opportunities to grow.

We have listened to our growing customer-base, and invested heavily into the areas that are most valued by you. We hear clients say that they value reliable and responsive service, along with creative solutions to streamline expenses and minimise equipment downtime.

Recently both our Technical and Customer Service teams have increased in size. We now have 14 full-time technicians, and a network of partner technicians in regional areas. We have also appointed a General Manager who has a proven track-record in increasing efficiency, maintaining quality, and ensuring growth of the business.

Our expansion plans to have strategically located bases close to our customers has continued with the development of a new base in Dubbo servicing the Western NSW Region and in Victoria as well. Watch this space for further locations.

Unlike other equipment dealers, Presidental is committed to growing our team to ensure that we maintain our quality and reliable service. This is the difference between sales companies, and service companies. Sales companies want to increase their sales. Service companies are committed to sustainable growth, so that we can not only assist you now, but also well into the future.

We recently developed a new preventative maintenance offering called "Pres-Essential". Many fast growing multi-site clinics are now experiencing the benefits of streamlined equipment maintenance costs and improved cashflow with less risk. This program is designed to offer a reduction in down time as well as service reminder calls for key equipment such as autoclaves. Don't put yourself at risk, let us do the scheduling.

We have exciting plans for 2020 and you can be confident that Presidental is continually looking at ways to add additional value and, to delight our customers. Put us to the test! Call us today and experience the Presidental difference!

Scott Donoghoe

Director, Presidental Pty Ltd

Dental Chair Annual Service from \$678

Just as your car benefits from an annual service, so will your chair!

A-dec Care is a 55 point check-up for your chair and includes replacement of listed serviceable components. Adhering to the 55 point list, one of our A-dec trained technicians will complete the full 55 point check in 2 hours.

Each day you will put your equipment to vigorous use providing treatment to your patients. Its many moving components will benefit from a regular preventative maintenance program, ensuring it continues to work when you want it to work.

With a view to maximising your equipment uptime, on completion the technician will provide a written report detailing any items deemed to require further attention.

For any Dentist that relies on equipment to perform at its best, all-day every day, a preventative maintenance and inspection plan is just as vital as regular dental check-ups on your teeth! Early detection of potential problems is key to minimising down-time.

Dear Doctor and Team,

On 2/4/19 the national budget delivered good news for small business with a program for accelerated write-off of individual assets costing less than \$30,000 (excl GST).

Small business is defined as those with less than \$2,000,000 annual revenue. From July 1 2019 until June 30 2020, small businesses purchasing individual assets costing less than \$30,000 (excl GST), with the threshold increased to \$30,000 for products purchased after February 2019, will qualify for an accelerated tax deductibility in the year in which they are purchased.

A \$29,999 spend would qualify for a \$8,249 tax reduction in the year of expenditure.

See below for a guide on accelerated depreciation amounts on some of our commonly sold equipment under the \$30,000 threshold - purchased on or after 1 July 2019, along with the net costs after tax in financial year 2019-20.

Products under the \$20,000 threshold	GST Exclusive Price	GST Inclusive Price	Depreciation Amount FY20, Purchased after 1 July 2019	Net Cost After Tax to Purchaser - 1 July 2020

Why Presidential?

- **Have you ever tallied up your yearly dental equipment maintenance bills?**
 - **Is your equipment consistently running at optimal performance levels and always reliable?**
 - **Do you currently have to deal with multiple service providers to maintain all the equipment in your clinic?**
 - **Is your technician A-dec authorised/100% maintaining your A-dec warranties?**
- Responsive callouts!
 - Reliable service - largest technical team
 - Easy to deal with – quality customer service
 - A-dec authorised technicians – warranties upheld
 - Technical experience on a range of equipment brands
 - Expert advice on ergonomics for pain and fatigue reduction
 - Service contacts available to streamline maintenance costs
 - Keep abreast of regulatory changes and future-proof your business

Testimonials

"I have been working with James Wallace, Presidential and A-dec for a number of years. James is always quick to get back to me, provides fantastic pricing and stays in regular contact. Presidential's service is always fantastic - from install to maintenance. My A-dec 500 chairs are completely reliable and provide outstanding comfort for my patients. If you are looking for new equipment contact James and he will look after you!"

Dr Mehdi Rahimi, Chatswood

"My experience with Presidential was absolutely great! I highly recommend Presidential to anyone who is looking for top-notch quality service and products. We are a two year old dental clinic and had started with a few basic dental chairs purely due to the costs. However we were always impressed with A-dec dental chairs due to their supreme build quality and having worked with them in the last ten years. Since we have grown as a business, it was time to match up our great service with great dental chairs. Having dealt with Presidential in the past, it was a no brainer that we contacted them for a quote on brand new A-dec 300 chairs for our surgeries. Luke Williams from their office was very prompt to respond to all our questions and the quote he gave us was very competitive. With them being local and the fact that we had previously had a positive with repairs and servicing with Presidential it took us no time to go ahead with the deal. The whole process of installation was so smooth and they were able to work in around the times when the surgery was shut for patients during the staff holiday break, and they even finished the whole job well before the estimated time. The technicians also moved my old chairs to another location as discussed earlier with no fuss. The best part about dealing with a professional company like them is that they visited us twice after installation to ensure everything was working fine and fixed the minor teething issues. Really their technicians are such great people to deal with, every single one of them. Since the time we have had the new chairs, not only our work efficiency has increased, it has also made our life easier by not worrying about day to day technical issues with the chairs. No wonder we won the Best Health improvement Services Award in the 2019 Hunter local business awards. We cannot recommend Presidential highly enough."

Nisheeth Agrawal, East Maitland

Treatment Consoles

Everything in its place and a place for everything. That's exactly what you get with the Preference Collection 5580 treatment console. With a redesigned midsection, we've streamlined the appearance and functionality. With the centre partition removed, we've opened up the usable space to accommodate a variety of larger ancillary devices. We've also increased the capacity of the wire chase making it easier to run cables or utilities through the cabinetry without cutting additional holes.

Think about how you work. What equipment do you use now, and what do you see yourself using in the future? Imagine yourself at your optimal performance. What does that look like? When creating a system that meets your specific needs, think about where you look for your equipment and what instinctively feels natural. With these considerations in mind, you'll be well on your way to creating a streamlined environment that works the way you do.

Preference Collection 5580 treatment console with soffit extension

SWING-OUT SHELVES
Rotate toward the operator for easy access to equipment.

ADJUSTABLE GLASS SHELVES

The new
gold standard
in dentistry

v.Prof. Dr. A. Troedhan (Austria)

EXPAND
YOUR EXPERTISE

CHOOSE THE REFERENCE

Surgeons and patients come together to universally recognize clinical benefits of ultrasonic bone surgery. Piezotome becomes the most globally trusted brand to perform delicate bone surgeries.

GIVE VALUE TO YOUR TREATMENTS

Piezotome Cube unmatched performance combined with the practitioner's clinical expertise paves the way for accurate, faster and atraumatic surgical procedures.

GIVE THE BEST TO YOUR PATIENTS

Improving patient care is our priority. Piezotome surgery outclass traditional instruments with surpassing healing, significantly less swelling, pain and complication in the clinical follow-up.

When compromise is not an option, Piezotome Cube is the easy way to give more to your practice and patients.

LED Implant Centre comes with the following:

- LED motor
- LEDD motor cord
- Progressive footswitch
- 2 brackets
- 2 handpiece holders
- Australian power supply
- 2 sterilisable irrigation lines
- 30 perforators

\$16,581

F27203

THE ALLIANCE OF TECHNOLOGIES

The Implant Center 2 combines, in a complete table-top unit, the most advanced ultrasonic and rotary technologies, ensuring total independence in increasingly diverse clinical areas.

Micro-motor LED

- Durable, precise and silent
- Fully sterilisable
- Corrosion resistant (induction)
- No lubrication needed

Customisable

- Four pre-set easily customisable programs
- Intuitive settings can be quickly adjusted during surgery

Variety

- Compatible with all light and regular contra-angles on the market (E-type - ISO 3964 connection)
- High torque and wide speed range for all kinds of treatment
- Ready for implant, perio and endo contra-angles

Stability

- Perfect balance between torque and speed for unmatched stability
- Maximum torque: 6Ncm up to 24,000Rpm
- Maximum torque at instrument end (20:1): 120Ncm
- Motor speed: 100 - 40,000Rpm

SERVOTOME

Electrosurgery • Unit

Servotome comes with the following:

- single footswitch
- a box with 10 electrodes
- conductive bracelet
- Australian power supply

\$3,315

F57340

INCISION & COAGULATION

30 watts is enough for greater efficiency.

Technological performances

- Controlled power
- Reliable and reproducible setting
- Safer with maximal efficacy
- Less energy loss

Controlled power for all electrosurgical applications

- Incisions/Excisions
- Frenectomy
- Gingivoplasty
- Coagulation
- Abscess incision
- Exposure of impacted/retained teeth
- Gingivectomy
- Etc.

Conductive bracelet

ACTEON®'s choice for a bracelet system is the best compromise for safety and convenience:

- Easy to install to enhance patient acceptance
- In direct contact with the patient's skin
- Easily disinfected
- Adjusted to a contact region with a low resistance
- Perfect size to avoid concentration of heat
- More security: in compliance with new standards

Reliable and compact unit

- Very compact
- User-friendly for a fast setting up
- Only two potentiometers (incision and coagulation)
- Settings can be very finely adjusted according to the different types of tissues encountered

Electrode holder

- Light and autoclavable
- Simple-to-mount electrodes
- The electrode is insulated by a sheath, only the active part is in contact with the soft tissue

Piezo Scaler with first-class performance

The W&H ultrasonic scaler stands out for its fast removal of calculus and gentle, minimally invasive application. It offers optimal comfort and is flexible in its use thanks to the efficient W&H tip system. State-of-the-art piezo technology improves efficiency and tactile feedback in all clinical indications.

W&H tip system

The tip system, developed with end users, is perfectly matched to the requirements of the respective application areas and the individual treatment steps.

Maximum efficiency

High-performance and gentle at the same time for a minimally invasive application and painless treatment.

Easy to clean

Both Piezo Scaler handpieces can be easily dismantled for simple and improved cleaning and both are thermo washer disinfected and sterilizable.

Handy and comfortable

The shape of the handpiece and its light weight ensure maximum comfort.

5x ring LED

Daylight-quality illumination of the treatment site thanks to 5 LEDs with the PB-3 LED handpiece.

Useful accessories

Change tips simply and safely with the tip changer and check them using the tip card.

Treatment site always cooled

The integrated spray ensures constant and effective cooling of the treatment site.

W&H Piezo Scalers

The W&H Piezo Scalers can be optimally integrated into your personalised workflow. Choose the exclusive stand-alone solution Tigon+, a Proxeo Ultra Piezo Scaler or take advantage of a Built-in Solution – convenient integration in your dental unit.

Tigon+

Exclusive stand-alone solution with warmed fluid for maximum patient comfort.

PB-530

The W&H Piezo Scaler with wireless foot control for increased freedom of movement and the ultimate in user comfort.

PB-520/PB-510

The compact models of the Proxeo Ultra Piezo Scalers are certain to be a hit with or without a tank.

Built-in Solution

Selected unit manufacturers offer W&H Piezo Scalers as an integrated drive solution as part of the complete system. They can be controlled simply and conveniently via your dental unit's control panel. Ask W&H or your unit manufacturer about W&H Piezo Scalers as a Built-in Solution.

Diverse range of uses

Thanks to infinitely variable power regulation the W&H Piezo Scalers can be effortlessly adjusted to the particular application and tip. From prophylaxis and periodontology to implant maintenance or endodontics right up to the micro-preparation of restorations, they boasts a particularly diverse range of uses.

The new generation of rotary polishing

proxeo TWIST LatchShort Polishing System

W&H Proxeo Twist
WP-66 W

\$650

It's in your hands

Whether you are working supragingivally, in the sulcus or in deep pockets, the combination of the right powder, the corresponding setting on the adjustment ring and the matching spray head ensures you always achieve optimal treatment results.

Main advantages at a glance

- Practical adjustment ring for simple switching between prophylaxis and periodontal treatments
- 2 different powder for a wide range of indications
- Optimally bundled powder jet for controlled spray pattern and less powder emission
- Spray attachments with different angles and in different lengths for optimal access
- Special periodontal accessories for thorough treatment of deep pockets
- Clear powder container with lateral opening for easy refilling and simple checking of powder level
- Range of turbine connections – suitable for all devices

piezomed

Surgical procedures have never been as quick and safe

Piezomed puts all the advantages of innovative ultrasound technology at your fingertips: High-frequency microvibrations allow cutting with incredible precision. In addition, with the so-called cavitation effect you can also ensure an almost blood-free surgical site. In other words: minimally invasive, maximally effective!

Bone block harvesting

Ideal for the transplantation of intraoral bone blocks. For fine and deep cuts in record time!

Lateral sinus lift

Atraumatic bone preparation and augmentation. Detachment of the membrane without perforating it.

Extraction with periosteal elevator

Even in complicated extractions, it is possible to avoid bone and soft tissue damage.

Alveolar ridge splitting

The surgical incisions are precise and reliable, the surgical site free from blood.

Micrometric incisions

Piezomed permits minimally invasive operations with maximum surgical precision.

Selective incisions

Protection of soft tissue: nerves, vessels and membranes are not damaged. Quicker healing process!

LISA VA-B & LARA Traceability

LisaSafe: No room for error

The traceability of your sterilisation protocol is becoming an ever-increasing requirement to ensure patient safety and to legally protect your practice.

For this reason, W&H has innovated by developing LisaSafe, a comprehensive traceability concept that reduces unnecessary handling and avoids the risk of error.

Making the link

The aim of a traceability system is to link a medical device and a sterilisation cycle to the patient. To achieve this, sterilised loads need to be labelled with the following information:

- Steriliser serial number
- Cycle or number
- Sterilisation date
- Load expiry date

LISASAFE VA-B includes additional QR code printer and scanner to track each separate instrument within the load!

A NEW ALL IN ONE waterproof glass keyboard – great for infection control

The new medical waterproof keyboard for all health professionals

- 3 modes of connectivity available – USB, RF and Bluetooth.
- Connect to PCs, tablets and smartphones.
- Keyboard supports Android, Windows and MAC OSX
- The numeric key pad can be switched to mouse pad mode.
- Keypad buttons have adjustable volume and vibration control
- Tempered glass surface is easily wiped over and cleaned

The Robert-Koch Institute states:

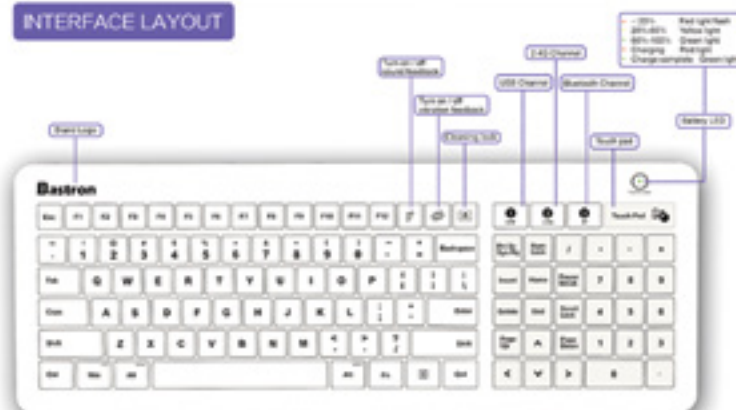

“Because of their mechanical construction, conventional keyboards cannot be disinfected.”

And recommends:

Keyboards with “smooth, liquid-proof and disinfectible surfaces” are recommended for hospitals and doctor’s offices.

How to Adjust and Wear Loupes

Interpupillary Adjustment.
This adjustment is controlled by turning the interpupillary adjustment knob back and forth, until the image converges into a circle.

Adjust the hinge mechanism so that the optics are angled approximately 30 to 45 degrees below a horizontal line. This will allow for the user to look down into the optics while working, keeping an upright posture.

Most loupes have a preset working distance. Be sure to position yourself back and forth to find the optimal distance for your focusing. Adjust the head-band to wear them comfortably.

How to Choose Quality Loupes

The best method to evaluate loupes is to look at an object with straight black lines, as above Figure A. The most common signs of poor quality loupes are low resolution, chromatic aberration and spherical aberration.

Chromatic aberration refers to color distortion. Because each color has a different wavelength, uncorrected optics cause the various wavelengths to focus at different points in space. The first color that generally comes out of focus is blue; when looking at black lines on white paper, poor quality loupes will display a blue haze just to the side of the black lines, as depicted in Figure B. Spherical aberration is stated to be the flatness of the image.

When viewed through loupes, an object that exhibits spherical aberrations would appear to be curved or spherical, as depicted in Figure B. The lines would not be straight as they should be, as in the original (Fig. A) or as a Gritter loupe image example like Figure C.

A simple piece of graph paper, can best reveal the difference between mediocre and high quality loupes, better than complex objects like models. Other important considerations are light transmission, depth of field and field of view.

Light transmission is important not only for quality of the image, but also for the comfort and safety of your patients. Optimised light transmission means that you can work with less light, reducing your eyestrain while minimizing the exposure of your patient to bright light.

Depth of field is defined as the range that's in focus away from and towards you without moving your head. The ergonomic benefits, or how comfortable the loupes are to wear, of a large depth of field are clear because there is less need to move your back and neck to work effectively.

Field of view refers to the amount of the original object that you can see at one time. Different applications have different needs. A bigger field of view is not always the better choice; for instance, an endodontist might prefer to see only the area of focus, whereas a periodontist would like to see as much of the surrounding area as possible.
