The Q-Series allows digital traceability of cycle number, time and temperature to be stored onto your PC through its integral data logger.

Comes with:

- Memory card data-logger
- Stainless steel basket
- ABS plastic lid
- Fluid sensor
- Degas mode

NEW Lyla

lyla

Significant for your needs S type sterilizer

Sterilization is deeply important in the reprocessing workflow of your dental instruments. That is why we aim for best standards: S type sterilization made by W&H is a safe and sustainable way to reprocess items, both wrapped and unwrapped. The Lyla sterilizer enormously facilitates daily activities thanks to fast cycles, effortless interaction, reduced maintenance and additional upgrade functions to fulfil your individual needs.

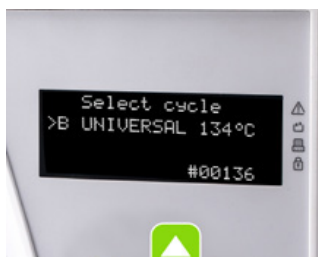

NEW Lina

lina

The NEW Lina Steriliser provides:

- Simple navigation and expandable – connectivity with RO units, auto-fill and auto-drain, and LisaSafe Traceability Kit
- Eco B sterilisation program – cycle time can be reduced by half for small loads
- Built-in data log via USB stick
- Integrated bacteriological filter, dust filter and automatic leak detector

MELAG Euroklav®

Unique in price and performance.

The quick and reliable Euroklav® Series represents an even more affordable alternative for the cost-effective steam sterilization. Euroklav® autoclaves are thus the ideal solution for practices and clinics using instruments that do not require sterilization in a Class B device. The MELAG Class S autoclaves are equipped with a high-performance vacuum pump in order to ensure best sterilization and drying results of even wrapped instruments with simple hollow bodies.

Performance

Quick sterilisation and drying times enable efficient workflows.

Safety

The integrated documentation interface provides maximum process reliability.

Flexibility

Customise the chamber depths and the water supply to your individual needs.

User-Friendliness

The MELAG 4-key concept and our digital tools make for an intuitive operating concept.

MELAG
competence in hygiene
Quality – made in Germany

MELAG Vacuklav®

ProClass – High-performance Class B steam sterilizers

The reliability, fast sterilization cycle times and large volumes provided by the Pro-Class autoclaves produce entirely convincing results: The tried-and-tested quality has established the Pro-Class series as the most-sold Class B autoclave of their class. All Vacuklav autoclaves can be automated by connecting the feed water supply with demineralized water to a water treatment unit.

Quality High-class and durable

Documentation Diverse and secure

Operation Quick and simple

Program Reliable and flexible

Cycle Runs Economical and efficient

Design Functional and attractive

for MelaTherm washers

MELAdem 53C

(compact height) for MelaTherm washers

W&H Traceability

Making the link

The aim of a traceability system is to link a medical device and a sterilisation cycle to the patient. To achieve this, sterilised loads need to be labelled with the following information:

- Steriliser serial number
- Cycle or number
- Sterilisation date
- Load expiry date

EliTrace QR code scanner
(to suit LISA VA-B steriliser)

Barcode scanner
(to suite LARA/LINA/LYLA sterilisers)

LISASAFE VA-B includes additional QR code printer and scanner to track each separate instrument within the load!

For older model W&H autoclaves a connection kit (\$110) may be required

The elegant design assists the time-saving treatment.

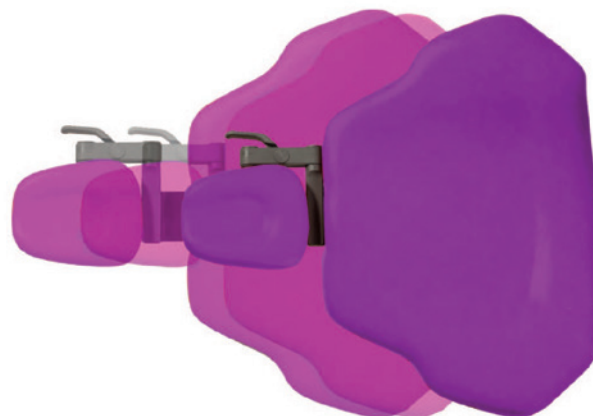

Instruments for up to 40 patients can be cleaned, disinfected and dried in a single treatment procedure.

F1 Dental Chair

Unparallel Ergonomics

F1 DENTAL CHAIR is compact giving any dental clinic a smart, modern and individual look. The patient sits comfortably during the whole treatment. The excellent working ergonomics allow the dental team to fully focus on the operation to be performed.

Comfort positioning for the patient – anatomic backrest for children and adults alike.

Movement range from flatbed to 90°/90° sitting up position offers easy access to patients and ensures optimal posture for all members of the dental team. Quick and easy Trendelenbourg position for emergency situations.

Ultra thin back and head rests allow you to work in a more comfortable and ergonomic working posture.

A soft polyurethane base – no rust, no cracks or chips

Emotio Universal Exam Chair

Features:

- Knee break entry position for all ages at 55cm
- Entry height 45cm with foot control for the elderly or of small stature
- 2 operating programmable positions
- Electric wheels (Lock and Roll)
- Battery backup
- Extended footrest
- Universal – Can be used for various procedures
- 5 year electrical parts warranty
- 10 year structural warranty
- Hands free operation possible
- Pressing any button during movement – stops operation
- Tilt adjustment option – great for gynae exams
- Lifting capacity: 205kgs

Kompact Universal Exam Chair

Following the huge success of the Midmark/Ritter® 204 exam chair manufactured by Promotal – the NEW Kompact is finally here!

- Versatile barrier free exam chair – small footprint
- Integrated retractable foot step
- Integrated sliding leg rest extension
- 4 drawers for storage
- Seamless upholstery
- Touch lamp can be mounted on either side
- Lifting capacity: 250kgs
- Extensive range of accessories/options

eKompact Universal Exam Chair

Features:

- Electric backrest adjustment
- Electric variable height from 48cm to 99.5cm
- Manual seat tilt 7°
- Electric hand control as standard
- Seamless formed upholstery
- 72cm upholstery width
- Several storage compartments: 1 side "Pass Through" + 1 front
- Retractable and sliding foot cushion
- Integrated retractable and adjustable stirrups
- Removable plastic gynaecological tray
- Paper roll holder Max length 50 cm - Ø 20cm
- With Block'n Roll system (retractable castors)
- Patient capacity: 205 kg

QUEST Exam Couch

Features:

- 65cm and 75cm widths available
- 3 x types of upholstery – flat, lateral padding, formed
- No openings – great for infection control
- Weight distribution over two arms increasing lift capacity
- Lock and Roll casters
- Universal couch – great for blood sampling, gynae
- Free paper roll holder
- Optional back up battery available in case of power failure
- Wired foot control available as an option
- Lifting capacity: 200kgs

iQUEST & iQUEST HOSPITAL Exam Couch

- Faster movement than the Quest
- Higher and lower travel than Quest
- All electric models
- Two program positions
- Hidden wheels electrically controlled
- Antibacterial upholstery
- Optional foot control
- Lift capacity: 250kgs

iQUEST HOSPITAL

- Can be used to transfer patients
- Optional wireless foot control
- Back up battery option
- Lift capacity: 250kgs

244 Bariatric Exam Chair

Features:

- Steel frame with pebble grey ABS cover
- Electric variable height from 46cm to 86cm
- Trendelenburg and reverse Trendelenburg
- Electric backrest adjustment
- Seamless formed upholstery
- Paper roll holder (max 60cm – diam 15cm)
- Hand control
- Capacity: 380 kg

gMotio Gynae Exam Couch

Features:

- All electric height – height, adjustable back rest and Trendelenburg
- Total control using the foot control and controls located on back rest
- 3 programmable positions with option to upgrade to 9
- Comfortable and ergonomic seat design with high density foam
- Integrated retractable wheels for easy movement and positioning of chair
- Standard seat rails
- Battery back up in case of power outage
- 6 litre plastic tray
- Built in paper roll holder
- Patient capacity: 205kgs

DUOLYS Exam Couch

Features:

- Standard versatile exam table
- Electric backrest
- Full flat table ideal for horizontal exams, ultrasonic and gynae
- Same base as Quest
- Urology pan available in place of gynae pan
- Side rails available
- Seat can be removed
- Battery back up available
- Patient lift weight capacity: 200kgs

iDUOLYS Exam Couch

Features:

- Same base as iQuest
- Hospital wheels optional
- Can be used to transfer patients
- Fully electric
- 2 memory positions
- Emergency trendelenburg
- Gas spring backrest
- Side rails
- 53cm low patient position
- Fast movements to positions
- Available in standard and hospital versions only
- Battery backup available
- Patient lift weight: 200kgs

APOLIUM Podiatry Chair

Features:

- Design based on the space shuttle seat for maximum comfort over a extended period of time
- Designed by Podiatrists
- Allows you to work standing up minimizing back strain
- Lumbar support option – pump up to the patient's comfort position
- Small foot print – can be positioned against a wall
- Dual foot rests – Single footrest also available
- No exposed parts
- Optional back up battery in case of power failure
- Highest level fire retardant
- Grey structure – doesn't show up dust
- Lifting capacity: 200kgs

TWEEGY 2 Patient Transfer Chair

Features:

- Robust
- Upholstery width 52.3cm
- Electrogalvanized steel frame
- Ergonomically designed push bar
- Adjustable armrests with stopper
- Retractable footrest with bilateral control
- Rear 300mm castors with centralised brakes
- Antistatic 100mm ball bearing casters
- 59cm seat height
- Interlocking for storing of multiple chairs
- Patient file holder
- Bumpers on front castors
- Large range of accessories
- Patient weight capacity: 200kgs

ENT Chair

Features:

- Hydraulic variable height from 58cm to 78cm
- Combined backrest and legrest movement (bilateral control)
- 360° rotation with pedal blocking system
- Height and angle adjustment of headrest with manual blocking mechanism
- Swing back armrests
- Chrome plated base
- Capacity: 170kg

POLYCARE Treatment & Dialysis Chair

Features:

- Electrical variable height
- Hand control
- Combined electric seat incline and height adjustment
- 4 castors diameter 125mm with brakes
- Steel frame with light grey epoxy finish
- Upholstery with 80 mm thick foam
- Capacity: 170kg

ELINEO Patient Transfer

Features:

- Variable height from 57 to 90cm (without mattress)
- Trendelenburg / Reverse Trendelenburg controls on both sides
- Polyester epoxy-coated steel structure, cloud grey
- X-ray translucent resin mattress base, C-arm compatible
- Four 200mm castors with centralised braking, two steering castors at the head end (controls on all four corners)
- Dual gas actuator adjustable backrest
- 4 x corner bumpers and protective bumpers along the sides
- Four accessory sockets
- Push handles
- Various mattress options available
- Patient weight capacity: 250kg

OCEA II Shower Trolley

Features:

- Hydraulic variable height from 59 to 96cm
- Bilateral pumping control
- Steel base and elevation structure with anti-corrosion treatment
- Light grey epoxy finish
- Removable headrest
- 4 x 150mm castors, 3 with brakes and 1 directional
- Polyester padded tub with reinforced PVC covering
- 4 shock absorbers
- SS fully retractable side rails
- SS welded push bars
- Trendelenburg control (only for 2392-01 model)
- Capacity: 200kg

DENEO Blood Sampling Chairs

Features:

- Unique – no chair like it
- Shaped to the human body
- Sit and Go positions
- Back goes down for head rush position
- Seamless upholstery
- Hydraulic operation – no power required
- Rotational head rest
- Optional handles
- Fixed height models available
- Variable hydraulic height models with or without rotation available
- Lifting capacity: 200kgs

Blood Sampling Chairs

Powered chair – standard features:

- Hydraulic or electric variable height
- Gas-spring assisted backrest, bilateral control
- 2 black polyurethane armrests
- 4 clamps
- Paper roll holder
- Capacity: 200kg

Powered Blood Sampling Chair

Fixed chair – standard features:

- Rectangular frame and square column
- Light grey epoxy covering
- Gas-spring assisted backrest, bilateral control
- 2 black polyurethane armrests
- Paper roll holder
- 4 clamps
- Adjustable levellers under basement
- Capacity: 200kg

Fixed Blood Sampling Chair

Blood Sampling Chair

Fixed Couches

FIDJI standard features:

- Steel frame with light grey epoxy finish
- Gas-spring assisted backrest
- Paper roll holder head end
- Adjustable levellers under basement
- Capacity: 200kg
