Basic treatment ANTI-SCRATCH protects against scratches and abrasions *K Anti-scratch treatment.

3)

ANTI-SCRATCH PLUS treatment Constitutes a barrier against surface damage, it protects against scratches and abrasions. It is certified according to the requirement of EN166 "K".

5 UDC Univet Double Coating The revolutionary coating created through UDC technology provides to your eyewear superior resistance from scratches and fogging for outstanding performance in any working condition. Deposition of coatings in separate processes on the surfaces of the lens: - exclusive anti-fog coating inside the lens

- multilayer scratch-resistant coating outside the lens. Both treatments are permanent and assure the product has high superior performance as per EN 166 standards. This technology is expressed in Monoart[®] Stretch Orange glasses.

Euronda

Basic treatment ANTI-FOG that prevents the formation of condensation. *N Anti-fog treatment.

ANTI-FOG PLUS treatment It's a permanent treatment that prevents the formation of condensation. It is certified according to the requirement of EN166 "N".

SOFTPAD technology SoftPad is a patented terminal that has been added to the arm of the eyewear to offer comfort and protection. Thanks to the innovative use of materials and a meticulous design, the ergonomics of these glasses reach a new level of comfort, providing perfect stability to the safety glasses and full adaptability to the face of the user. In addition to the length adjustment in 3 positions, the SoftPad system has a further tilting movement that allows the device to fit perfectly to the user's head. The SoftPad system is supplied with the Monoart® Cube glasses Monoart® Cube Orange/Smoked glasses and Monoart® Stretch glasses.

Eyewear marking

Added to personal protective equipments (PPE) the marking guarantees respect of current safety regulations. Required by the law, the marking is added both on the lens, to identify scale number, manufacturer, optical class, mechanical resistance and optional requirements, and on the frame to identify manufacturer, reference normative and mechanical resistance.

European Normatives

EN 166 Personal eye-protection - Specifications / EN 167 Personal eye-protection - Optical test methods EN 170 Personal eye-protection - Ultraviolet filters. Transmittance requirements and recommended use

A-dec 2-minute DWL Digital Tester & Surface Swabs Kit

A-dec now has a new chairside solution for quantification of total flora in DENTAL UNIT WATERLINES that is rapid, reliable, easy to use and economical to help improve health risk management.

Contamination or degradation of water's microbiological quality is caused by one or all of the following:

- Untreated water supplies
- Low quality network materials
- Compromised operating procedures.

There is no definitive solution to eradicate microbiological issues. Only an approach starting with the observation of the network state, followed by the monitoring of the corrective action effects can result in effective management of microbiological risks.

HOW DOES IT WORK? 2-MINUTE ANALYSIS

sampling volume

Low detection limit

Elimination of free

ATP and inhibitors

High sensitivity

No time wasting

- . Instantaneous analysis of your sample
- Only the intracellular ATP is measured

Quantitative results Consideration of

environmental parameters

Avoids false negatives .

CompoSMOOTH

THE SURFACE IS THE KEY ...

• German-Made • Hand-Crafted Instruments • Highest Quality!

HELMUT ZEPF

For Conservation

Total Conservation Package

Addition of the CompoSMOOTH Brush & Application Insert Set

The CompSMOOTH, a special silicon brush, allows an easy adaption and modelling of the composite surface before polymerisation. Even `sticky' composite can be adapted in an optimal way. The perfect surface morphology is created by only slight pressure.

Set includes:

- Code 19.200.00 CompoSMOOTH Brush Holder Code 19.201.11 SoftApplication Insert - tapered - Set 12 Code 19.201.21 SoftApplication Insert - flat - Set 12
- Code 19.201.31 SoftApplication Inser pointed Set 12

For Extraction

Upgrade of Extration Forceps to RoBa edition

With the patented design, RoBa is the advancement of conventional extracting forceps with the advantages of a tapered deep grip. The modified beaks fit exactly on the teeth which ensures a maximum grip on the appliance. The new beaks are available for all figures in the upper and lower jaw.

The billow grind claws radially into the teeth and avoids a `riding' between the tooth crown and the inner contour of the beak.

ZEPi

the convex tooth contour. With deep grip in the alveolus on the neck of the tooth or crown, RoBa ensures a parallel and maximum grip.

This upgrade changes those Xcision Forceps marked * to RoBa type

For Extraction

Addition of the Benex II Extraction System

In modern dentistry, Implantology following extraction is favoured.

Benex II provides gentle & simple extraction of roots over the whole mouth.

Damage to soft tissue and the surrounding bone is minimised.

Due to the longitudinal extraction method, Benex II provides the optimal base for directimplantation. It is also a valuable aid for retarded implantation after extraction

Set includes: Code 12.303.00 Benex II Set - Basic type

12.302.00

Please contact 1800 773 743 or via email – orders@presidental.com.au

Addition of the BIONIK Mirror Retractor

The The Revolutionary BIONIK Mirror and Mouth Retractor provides ease of retraction and viewing access never before possible.

Code 24.062.30 24mm Retractor/Mirror Width OR

Code 24.062.31 27mm Retractor/Mirror Width

Addition of Wisdom Teeth Extraction Forcep Set Xcision Forceps Ash 67 for Upper Wisdom Teeth

Xcision Forceps Ask 79 for Lower Wisdom Teeth Code 12.079.95Z

Addition of the Universal Forceps

No surgery should be without the Zepf Universal Forceps.

Able to be used for securely grasping provisional plastic items, bridges, nerve instruments, impacted matrices, attaching inlays, setting interdental wedges etc. The Tungsten Carbide jaws provide secure grip.

Code 19.281.15TC

Addition of Contrast PA Probe Inserts

Zepf Contrast PA Probes are made of flexible plastic to adapt optimally to the anatomy of the pocket depth.

Sterilisable, the tips are reusable until they bend or the graduation colour fades.

For use with the Zepf BIONIK handles included with instrument set.

Different graduation versions available.

Addition of Crown Spreading Pliers

The Helmut Zepf Crowning Spreading Pliers are designed for spreading Crowns without pressure on the root or neighbouring tooth.

Sturdy, and a spring handle to hold the instrument securely in place.

Code 19.277.01Z

Addition of the Universal Finishing Clamp Set

These innovative holding instruments for finishing strips of all types. The instrument is designed for ergonomic functionality to contribute for the significant easing of work involving finishing strips and other applications.

For NSK and Borden turbines 2 (3) hole connection

Base Adaptors

02685000

Included in the assistine base kit, for turbine handpieces or adaptors with 4 hole connection (with or without light) assistina 301 assistina 3x3

> Ask us about annual servicing on your Steriliser or Assistina

Interested in improving your steri-room workflow? Ask us about the latest options available

Buy an extra base adaptor and save time

Time Saving Hint...

If you have multiple brands of high speed (turbine) handpieces you can save time by purchasing a base adaptor for each coupling. This will enable you to switch between handpiece brands with ease.

Ask us about Handpiece Servicing!

Did you know that handpieces require regular servicing to maintain optimal performance? Just like the rest of your equipment, handpieces need to be on a maintenance schedule, and replaced every few years. If you are not getting optimal performance out of your handpieces, give us a call today and we can arrange to quote or assess your handpieces so that you won't have to put up with sub-performance any longer!

Please contact 1800 773 743 or via email – orders@presidental.com.au

Always choose the right one for your handpiece

NSK PANA Spray Plus Nozzles

KV Nozzle - Z090051 For KaVo® MULTIflex Coupling

SR Nozzle - Z090052 For Sirona® Quick Coupling

Scavenging Hoods and Tubing Sets

Axess Low Profile Nasal Hoods

The Axess low profile design provides unencumbered mouth access whilst its small lightweight scavenging tubing is easy to work around, enabling clinicians to deliver excellent efficient care to more patients.

Clearview Nasal Hoods

Accutron's Clearview Scavenging Hood System incorporate a double hood with a transparent outer hood, allowing the doctor to monitor the patient's breathing for increased safety.

Combined with scented hoods,

Clearview combined with NO² reduces patient anxiety for treatment.

Designed for the lightweight Axess autoclavable tubing set.

Available to fit existing Tubing Sets - see below for Adapter Kits.
