44W of unprecedented power.

NEW Ti-Max Z Series Air Turbine Handpieces

Z990L/Z890L

Experience like never before, the unprecedented power of the industry's best-in-class 44W air turbine handpiece as it delivers powerful cutting strength.

It makes zirconia removal easy, reducing chairside time and minimising patient discomfort.

DYNAMIC POWER SYSTEM

The "DYNAMIC POWER SYSTEM" has been developed using the latest fluid simulation software. This enables efficient conversion of air into power to achieve a significant increase in power from 26W to **44W***. Makes zirconia removal easy, reducing chairside time and minimising patient discomfort.

*Z990L, Air pressure at 0.42 MPa.

DURAPOWER CHUCK

NSK's proprietary technology enhances the chuck function. The wedge-shaped part grips the bur firmly with force generated by the wedge effect.

100° angled head

Considering the physiological curves of the oral cavity (Curve of Spee and Curve of Wilson), the 100° angled head enables easier access and high-torque cutting for efficient treatment in the oral cavity.

Quick Stop Function

The Quick Stop Function stops high speed rotation in around 1 second. It improves safety in the oral cavity by halting drill spin. The result is efficient, high speed cutting and incredibly safe surgeries.

DURAGRIP coating

The surface of the pure titanium body is blasted to eliminate shiny surfaces by producing micro surface unevenness, and then coated in our original "DURAGRIP" coating. As well as improved scratch resistance and durability, the uneven surface ensures a comfortable, non-slip grip.

Easily replaceable cartridge

The cartridge can be easily replaced by the user, eliminating time lost from sending the handpiece in for repair and ensuring a consistently good treatment environment.

Microfilter

Equipped with built-in water filter. The 0.3 mm diameter mesh water filter prevents foreign matter from entering the water line, reducing problems of clogging.

Enbio Pro & Enbio S

enbio®

Enbio sterilisers are up to 6 times smaller and 3 times lighter than a typical class-B / vacuum autoclave. But when it comes to work efficiency, they keep up the pace.

Superfast sterilisation

Up to 4 times faster cycle time than the typical autoclave.

Perfectly dry pouches in no time

Enbio S sterilises a load of wrapped instruments in just 15 minutes (Enbio Pro – 18 minutes).

Emergency sterilisation

In case of emergency, you can sterilise unwrapped instruments for immediate use in just 7 minutes.

Simple

Enbio is so simple to install and operate that it takes longer to explain how simple it is.

Inaudibly silent

Enbio autoclaves work unbelievably silent. Wherever you use it, nobody will notice it's working.

Enbio Magic Filter: forget about water

Imagine a race car covering a long distance on a teaspoon of fuel. Enbio autoclaves are like that. With Enbio Magic Filter as a standard equipment, they can run up to 1000 processes on just 1 litre of demineralised water. No tap or sink required.

Enbio S. Speedmaster.

Enbio S is compact to fit even a cramped space. Unbelievably short process times will save your procedure in emergency, or allow sterilisation of the instruments as you go, between patients.

Enbio PRO. Small foot. Big space.

Enbio PRO is an ideal solution as a basic workhorse in a small practice. Superfast sterilisation and room to hold most of the instruments, including popular implant cassettes.

PRO►VECTA® 2D OPG

truly perfect imaging

High-speed scanning with low X-ray dose

All functions at your fingertips

The innovative 7" (177.8mm) touchscreen allows access to all functions of the S-Pan while positioning the patient.

Always the right image size

With an image height of 150 mm, the ProVecta S-Pan displays an extended diagnosable jaw area and the paranasal sinus area in one scan. The S-Pan features a pediatric mode that reduces the radiation dose while providing same high quality images.

Panoramic X-ray programs

With a total of 17 X-ray programs, you are well equipped for every diagnosis. In addition to the standard panoramic program, ProVecta S-Pan offers:

- Right, Left and Anterior only panoramic projections
- 4 child programs which reduces the dose by 45 – 56 % without loss of diagnostic information
- 5 programs for orthogonal/bitewing X-ray images
- 2 programs for mandibular X-ray images (functional diagnosis)
- 2 programs for sinus X-ray images to display paranasal sinuses

SOFTLY Amalgamator

Softly is very stable, extremely quiet, and very easy to clean and maintain. To guarantee totally safe operation, Softly is deactivated when you open the front cover to access the capsule. Softly is made entirely of injection-molded ABS material.

It complies with all electrical and mechanical safety standards.

Contact Presidential on 1800 773 743 for Special Softly Pricing

SERVOTOME

High frequency electrosurge for orthodontics, periodontics and other oral procedures.

Efficient & Secure Surgery

Servotome totally respects biological tissues: the fine and even cut with no side effects allows good-quality healing.

30 Watts is Sufficient

Due to the technology evolution associated with the conductive bracelet, 30 watts is sufficient to perform all dental incision and coagulation procedures providing greater safety.

Experience the benefits of electrosurgery

Electrosection

Vaporizing the tissue with the active electrode makes it possible to cut quickly without damaging the edges of the incision.

Fulguration

Makes it possible to surface coagulate gingival tissue while protecting the underlying layer.

Coagulation

Concentrating energy at the surface of a massive electrode makes it possible to diffuse the heat to the surrounding tissue and produce instantaneous hemostasis.
