

Message from the Director

Dear Doctor and Team,

Presidental is a complete service company focussed on assisting Dental, Medical and Veterinary clinics. Over the 37 years I have been servicing equipment, I know that it is important to have quality new equipment alternatives once equipment is no longer economical to repair. We service a range of equipment brands, however we believe A-dec to be the most reliable equipment on the market, and the best value for money. For this reason, we are proud to be many customers' preferred National A-dec Equipment Dealer.

Whilst the past 37 years have shaped who Presidental is today, the last few years have seen some exciting milestones and presented significant opportunities to grow.

We have listened to our growing customer-base, and invested heavily into the areas that are most valued by you. We hear clients say that they value reliable and responsive service, along with creative solutions to streamline expenses and minimise equipment downtime.

Recently both our Technical and Customer Service teams have increased in size. We now have 22 full-time technicians with many of our technicians celebrating industry experience of 10 and 15 years. We also have a dedicated network of expert partner technicians in regional areas. We have also appointed a General Manager who has a proven track-record in increasing efficiency, maintaining quality, and ensuring growth of the business.

An important factor of our growth relates to our culture and personal commitment to not only our customers but also our internal team. With many of our customers operating their businesses 7 days a week, we know our support must exceed their needs and be there for them when they need us. Since day one, we have always provided 24/7 support. Even though we are the largest dental service company in Australia we remain committed to providing personalised customer support and solutions.

We continue to plan expansion with additional strategically located bases close to our customers. True to our commitment we have now expanded our offering to include new state based offices in Clayton VIC & Silverwater Sydney. These new locations include a state of the art showroom, technical workshop & warehousing. Last year saw the purchase of long-established & respected service company 'RJ Dental Services' in Mansfield to bolster our service offering to South East Queensland and Northern NSW. This year was the purchase of another well-respected service company 'Suntech Dental Equipment Services' which provides better access and improved servicing for Sunshine Coast and North.

Unlike other equipment dealers, Presidental is committed to growing our team to ensure that we maintain our quality and reliable service. This is the difference between sales companies, and service companies. Sales companies want to increase their sales. Service companies are committed to sustainable growth, so that we can not only assist you now, but also well into the future.

We recently developed a new preventative maintenance offering called "Pres-Essential". Many fast growing multi-site clinics are now experiencing the benefits of streamlined equipment maintenance costs and improved cashflow with less risk. This program is designed to offer a reduction in down time as well as service reminder calls for key equipment such as autoclaves. Don't put yourself at risk, let us do the scheduling.

We have exciting plans for 2024 and you can be confident that Presidental is continually looking at ways to add additional value and to delight our customers. Put us to the test! Call us today and experience the Presidental difference!

Scott Donoghoe

Director, Presidental Pty Ltd

Dental Chair Annual Service from \$565

WE SERVICE A
RANGE OF DENTAL
CHAIR BRANDS,
ASK US FOR A
QUOTE

Just as your car benefits from an annual service, so will your chair

A-dec Care is a 70 point check-up for your chair and includes replacement of listed serviceable components. Adhering to the 70 point list, one of our A-dec trained technicians will complete the full 70 point check in 2 hours.

Each day you will put your equipment to vigorous use providing treatment to your patients. Its many moving components will benefit from a regular preventative maintenance program, ensuring it continues to work when you want it to work.

With a view to maximising your equipment uptime, on completion the technician will provide a written report detailing any items deemed to require further attention.

For any Dentist that relies on equipment to perform at its best, all-day every day, a preventative maintenance and inspection plan is just as vital as regular dental check-ups on your teeth! Early detection of potential problems is key to minimising down-time.

EXPERIENCE A-DEC 500 Pro

New thinking, new possibilities.

+DYNAMIC SCREEN 7 (DS7)

- Allows diagnostics without removing any covers*
- Customisable features that allow for maximum efficiency
- Improved viewing angle & intuitive navigation, improved user experience

+CONNECTIVITY WITH A-DEC+ PLATFORM

- Scalable platform grows with your practice
- Updatable software keeps your equipment on the cutting edge of dentistry
- System analytics to keep downtime to a minimum

+FIRST OUT LOGIC

- Allows you to operate 1 handpiece, while another is taken out of holder to change-over bur without risk of 2nd handpiece running

A-DEC 300 on 500

The best of both worlds – ultimate patient and operator ergonomics, A-dec+ connectivity, along with a mid-range price-point.

300 PRO DELIVERY SYSTEM

Compact, connected, and more powerful than ever

Get everything you want in a dental delivery system--and more--with the A-dec 300 Pro. More functionality. More versatility. More forward-thinking design.

Enhanced control pads provide an intuitive, responsive, and dynamic user interface. When combined with the optional A-dec+ Gateway, you get a connected experience that can grow with your practice.

The Control Pad 5 (CP5) and Control Pad 5i (CP5i) show just what you need to know in the moment. Visual cues, audible tones, and clear text confirm your commands so you can be confident as you carry out your procedures.

The Control Pad 5 (CP5) and Control Pad 5i (CP5i) show just what you need to know in the moment.

Visual cues, audible tones, and clear text confirm your commands so you can be confident as you practice.

*Now available with enhanced optional Continental delivery providing longer reach, less resistance, and optimised performance.

500 CHAIR:

Optimal access

Everything you need is easy to position and comfortably within reach. With an ultra-thin backrest and slim-profile headrest, you have ample leg room under the chair for ergonomic positioning and optimal oral cavity access.

Attentive design

Precision hydraulic motion allows quiet, gentle stops and starts during patient positioning, eliminating anxiety from jarring movements. Coupled with the virtual pivot, which synchronizes movement with the natural motion of the patient, there's no readjusting when the chair is reclined or returned

Whole body support

By reducing pressure points and streamlining support through scientific pressure mapping, patients remain comfortable during procedures. With the stingray-shaped backrest fully supporting their back and shoulders, the plush, one-piece quilted upholstery (sewn option) only adds to the experience.

A-DEC 300 Pro

*Everything you want
in your equipment.
And more.*

+IMPROVED CONTINENTAL WHIPS (similar to 500 Pro Delivery System)

- 12" improved downward reach, 9" of forward travel & 5" side-to-side movement allows for versatility of the 500 whips on the 300 platform

+INCREASED VERSATILITY OF 300 PRO IS NOW COMPLETE WITH THE 511B CHAIR

+CP5 / CP5I CONTROL PADS

- Dynamic chair presets show the exact position of the chair, providing reliability for the operator
- 4 adjustable timers, one touch light control, scaler integration & screen lockout provide improved accessibility on the 300 platform
- CP5i comes with timed flush, air & Water coolant integration options and coolant vaporiser option

+CONNECTIVITY VIA THE A-DEC GATEWAY

- Unlocks access to data from equipment, pushes software updates and eventual synching of settings across devices from web/mobile applications
- Remote monitoring offers visibility into daily use and long-term performance of A-dec equipment as well as diagnostic data

A-DEC+ GATEWAY

What will connectivity do for your practice?

The A-dec+ platform is a new technology ecosystem designed to take your practice to the next level. A-dec+ helps improve efficiency and unlocks new possibilities.

Experience the confidence that comes with knowing your equipment stays relevant as your practice grows, and gain improved visibility into equipment performance and diagnostics.

Bring A-dec+ connected dentistry to your practice for lasting peace of mind.

Manage equipment across multiple locations

Now dental service organizations (DSOs), dental schools, and multi-site dental practices can manage and monitor dental equipment more efficiently.

With the A-dec+ app group account, you're able to view aggregated equipment data from multiple clinics. This helps maximize Return on Investment (ROI) and gives better visibility into total cost of ownership.

A-dec+ connected dentistry

SOFTWARE UPDATES

Register on the A-dec+ app to access new product features, security and stability improvements, and the latest integrations and enhancements.

REMOTE MONITORING AND ANALYTICS

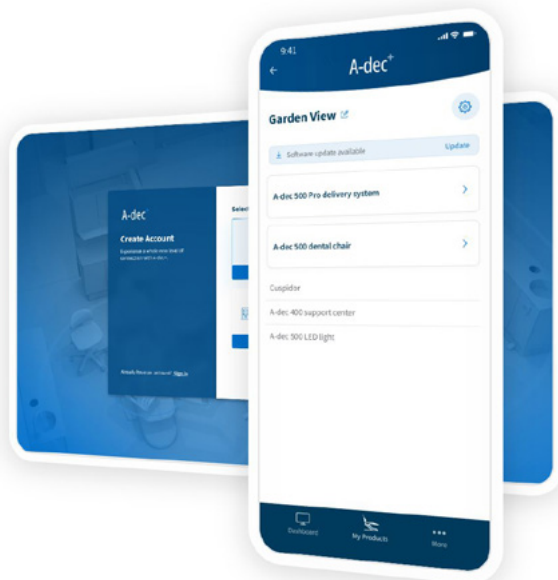

Manage and monitor equipment across a single practice or multi-clinic organization through the A-dec+ app.

SIMPLIFIED TROUBLESHOOTING

Get diagnostic equipment information in the A-dec+ app or on the Dynamic Screen 7 without having to remove equipment covers.

PRIVACY AND SECURITY

A-dec+ features encrypted data communication, the trusted industry standard for cybersecurity.

A-dec+ web and mobile app

Access the entire A-dec+ technology ecosystem through a centralized hub: the A-dec+ app.

The app is available on the Apple App Store and Google Play.

Treatment Consoles

Everything in its place and a place for everything. That's exactly what you get with the Preference Collection 5580 treatment console. With a redesigned midsection, we've streamlined the appearance and functionality. With the centre partition removed, we've opened up the usable space to accommodate a variety of larger ancillary devices. We've also increased the capacity of the wire chase making it easier to run cables or utilities through the cabinetry without cutting additional holes.

Think about how you work. What equipment do you use now, and what do you see yourself using in the future? Imagine yourself at your optimal performance. What does that look like? When creating a system that meets your specific needs, think about where you look for your equipment and what instinctively feels natural. With these considerations in mind, you'll be well on your way to creating a streamlined environment that works the way you do.

Preference Collection 5580 treatment console with soffit extension

SWING-OUT SHELVES
Rotate toward the operator for easy access to equipment.

ADJUSTABLE GLASS SHELVES

VistaCam iX – (Benchtop only)

Brilliant images and excellent caries diagnosis

One camera, many options

Handpiece holder on TFT monitor

Hygienic protective covers

Key features:

- Excellent image quality
- Software analysis for the detection of caries lesions and visualisation of plaque through fluorescence
- Diagnostic aid for detection of proximal caries – without any radiation exposure
- Multi-user capable
- Images are saved in the Imaging Software from Dürr Dental

VistaCam iX HD Smart – (A-dec chair-integrated or benchtop option)

for HD-quality diagnostics support

The innovative intraoral camera with interchangeable head system

Key features:

- Brilliant HD image quality even in video mode
- Infinitely variable autofocus for everything from macro to extraoral images
- Software evaluation to detect caries lesions and display plaque (Proof interchangeable head)
- Diagnostic aid for detection of proximal caries – without any radiation exposure (Proxi interchangeable head)

VistaScan Mini View 2.0

Plug into the future

Ready for the dental practices of tomorrow

Not only is the design of the new VistaScan Mini View 2.0 futuristic. The technology behind it is just as pioneering. It uses the latest image plate technology and works together with VistaScan IQ image plates to open up many new AI-based features. With Smart Scan Workflow, work becomes even more efficient thanks to the ability to link IQ image plates directly to the patient. Together with the superior image quality of the tried-and-tested PCS technology, this new system will make your dental practice completely fit for the future.

This is what counts:

- PCS technology for exceptional image quality
- SmartScan workflow
- Easy Feed concept for all intraoral formats
- High-resolution glass touchscreen display
- Extensive package of intelligent automation functions in combination with VistaScan IQ image plates and VistaSoft AI

Smarter workflows with SmartScan

SmartScan Workflow uses automation to make your work more relaxed, more efficient and more reliable.

1. Assign the image plate

Use the VistaScan Smart Reader to assign an image plate to a patient in VistaSoft. This puts VistaScan Mini View 2.0 in 'ready for image acquisition' mode.

2. Scan the image plate

Now scan image plates from different patients in any any sequence, one after the other.

3. Assess the X-ray image

VistaSoft automatically assigns the X-ray images to the correct patients.

VistaIntra DC

A systematic X-ray solution – perfect in function and design

The intraoral X-ray generator VistaIntra

For over 50 years, dentists, clinics and X-ray centres around the world have been using innovative products from Dürr Dental and benefiting from our expertise and competence in radiography. Our excellent image plates, sensor and scanner technology for digital radiography is setting standards in terms of image quality. With the VistaIntra we offer a high quality X-ray appliance for excellent intraoral images. VistaIntra impresses with its exemplary ergonomic design and is perfectly matched to Dürr Dental image plates. All its features - from the radiation source over the X-ray film, the scanner and sensors up to the imaging software - are infused with the expertise and quality of Dürr Dental. Dürr Dental offers you a complete system from a single provider which assures you the best image results thanks to optimally matched system components. Whatever image receptor you use, VistaIntra provides the basis for perfect image quality.

Features:

- Modern, sleek design for simple, precise positioning
- A simple operating concept
- Perfectly matched to the image plate or sensor
- Highly reliable, long service life of the X-ray tube
- DC generator with 0.4 mm focal spot

Best in class

We seek to provide the very best to our customers via the production of excellent products and outstanding services. That is our aim with regard to user friendliness, reliability and design.

VistaPano S 2.0 and VistaPano S Ceph 2.0 – Efficiency in a new light.

The perfect combination of design and image quality

VistaPano S 2.0

Digital panoramic X-ray device with S-Pan technology

This is what counts:

- S-Pan technology for easier diagnostics
- Outstanding image quality thanks to the latest generation high-resolution CsI sensor
- Slim design with a small footprint
- Panoramic images scanned within 7 seconds
- 8" glass touch display for intuitive operation
- Extensive package of intelligent automation functions with VistaSoft AI

VistaPano S Ceph 2.0

Improved efficiency – reduced radiation exposure

This is what counts:

- Ceph images scanned within 2 seconds
- Excellent image quality
- Low radiation dose
- With two high-end, state-of-the-art CsI sensors integrated in the unit, there is no need to change the sensor
- Height-adjustable on the Ceph side
- Comfortable to use, as no secondary aperture is needed

VistaPano S Ceph 2.0 – Bringing colour into your practice.

Ambient light in countless colour moods will keep your patients calm and relaxed.

VistaVox S and VistaVox S Ceph 3D

3D, 2D and cephalometric projections images with exceptional image quality

Taking diagnostics to the next level

VistaVox S combines diagnostic reliability with efficiency and lower radiation doses

This is what counts:

- Ideal 3D imaging volume matched to the jaw arch (Ø 130 x 85 mm)
- Ø 130 x 50 mm volumes for single images of the upper and lower jaw
- Ø 50 x 50 mm volumes in 80 or 120 µm resolution
- Excellent image quality in 2D and 3D thanks to the high-resolution Csl sensor with a pixel size of 49.5 µm
- Reduced radiation dose thanks to the anatomically adapted volume
- VistaSoft – modern, ergonomic image processing software

Ideal imaging volume, easy positioning, high image quality: VistaVox S represents a milestone in the field of 3D X-ray systems. Thanks to its unique technology, the 3D images generated with this system cover everything you need for reliable diagnoses, well-founded treatment decisions and convincing patient communication. In addition, the S-Pan technology of VistaVox S also enables pinpoint-accurate OPG image acquisitions in superior Dürr Dental quality. Thanks to a high-resolution Csl sensor with a pixel size of 49.5 µm, you can benefit from exceptional image quality – both in 3D and in 2D. All of these things make VistaVox S not only a highly efficient solution for dentistry, but also a safe investment.

VistaVox S offers not only excellent value for money, but will also help you and your surgery team to increase your flexibility. In addition to CBCT images, you can also use VistaVox S to generate brilliant OPGs, which set new standards in the image sharpness of extraoral images. Thanks to this versatility, the new VistaVox S will really add value to your surgery. The unit also raises the bar in terms of efficiency. It enables the scan of a complete OPG image in a very short time of just seven seconds with an exceptionally low radiation dose. This will save you valuable time – not only in comparison to conventional X-ray solutions.

Simple and efficient patient positioning

Three alignment lights (sagittal, Frankfurt plane and Canine) for 2D X-ray images and two alignment lights (sagittal and Frankfurt plane) for 3D images make positioning a pleasant, easy and efficient task.

The display: all of the functions at a glance

The innovative 7" touch-display of the VistaVox S guides the operator reliably and clearly through the necessary steps. Handling and navigation are exceptionally intuitive, ensuring that the process of taking X-rays is as smooth and easy as possible.

VistaSoft AI included

The imaging software for digital workflows in dental practices

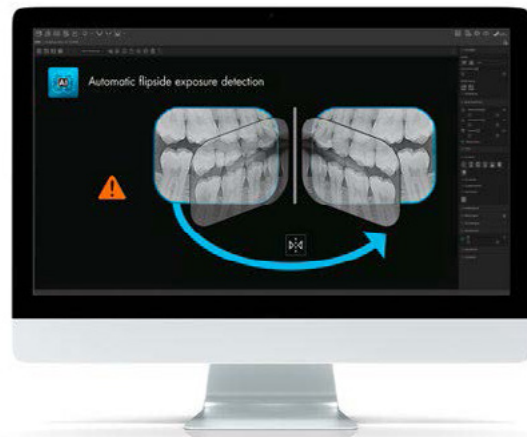

From acquiring and editing digital X-ray images and camera images to sharing images via the cloud and planning implants and drilling templates – VistaSoft brings together all of the different areas of dental imaging.

Automatic image rotation

The imaging software uses an algorithm based on artificial intelligence to check the orientation of intraoral X-ray images with the aid of the anatomical features shown and corrects the rotation of the image automatically if needed. This will save you valuable time.

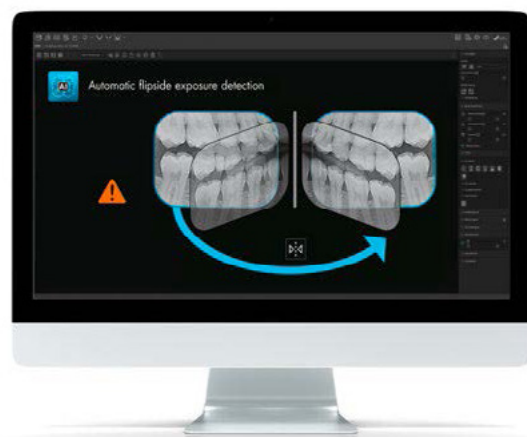

"Wrong side" exposure detection

VistaSoft AI automatically detects if the wrong side of the image plate has been exposed, and issues a corresponding warning for the user.

Automatic checking of image plate quality

In conjunction with VistaScan IQ image plates, VistaSoft AI enables automated checking of the quality of image plates. Here, the AI-assisted system automatically checks every single X-ray image to see if the image quality is deteriorating. In the process, the system assesses the condition of the image plate and automatically recommends its replacement, if necessary, to ensure that image quality remains consistently high at all times.

Automatic tooth detection

With the aid of artificial intelligence, all the teeth captured in the image are automatically detected and saved in the dental chart.

CamX Elara

Designed with all ergonomic demands in mind, this sophisticated intraoral camera will improve patient communication, leading to higher case acceptance and better tracking of treatment.

- Excellent Image Quality: 8 White Light LEDs positioned around the lens provide bright homogeneous image quality.
- Always in focus from 5-35mm making the camera easy to use and eliminating the need for further adjustments.

Product Code: J2100

CamX Spectra

AIR TECHNIQUES equipped for life

The only caries detection aid that uses fluorescence technology to visualize and discover caries earlier, as well as plaque and calculus.

- 4 Violet LEDs stimulate metabolic products found in cariogenic bacteria, causing them to glow red while healthy enamel glows green.
- Caries and plaque filters in the imaging software show caries activity by means of a color scale and numeric evaluation.
- Repeatable and reliable documentation for monitoring progress of caries due to the 8mm spacer.

Product Code: J2800*

CamX Triton HD

INTERCHANGEABLE HEAD SYSTEM.

Easily and quickly change between caries diagnosis and intraoral imaging.

- The Intelligent Interchangeable head system assists in the diagnosis and early detection of caries. Cam-X Triton HD quickly and easily changes between caries and plaque detection and intraoral imaging.
- The Cam-X Triton HD delivers vivid, sharp images with one click autofocus.
- Simplify clinical procedures and case acceptance.

Product Code: J2700*

* Code listed for Spectra and Triton include package of interchangeable heads.

SensorX

AIR TECHNIQUES equipped for life

SensorX – The New Sensor from Air Techniques

The SensorX intraoral sensor is designed to easily capture intraoral X-ray images that can be viewed, stored and manipulated for diagnostic use by today's modern dental practice.

SensorX, combined with ScanX is the ideal complement for a complete hybrid solution.

Ease of Placement with Image Quality & Comfort in Mind

Thanks to the rounded corners, SensorX can be positioned closer to the tooth, helping to produce a sharper image.

The enhanced CsI CMOS technology of the SensorX ensures the fast transmission of high-resolution images. The new Air Techniques CsI Scintillator layer reduces scatter and concentrates the light collection, which dramatically influences the end result image quality.

ScanX Edge

ScanX Edge Digital Radiography System is Smart, Compact and Reliable.

ScanX Edge offers reliable, compact, and virtually maintenance-free chairside imaging. Thanks to its small footprint, it can be easily positioned in the operator's room – allowing you to take X-rays and scan them chairside. Capable of digitizing intraoral plate sizes 0, 1, and 2, featuring ScanX RFID IDX PSP Technology. ScanX Edge offers Air Techniques' PSP technology in its most compact form for state-of-the-art and reliable diagnostics. It has never been easier to enter the world of PSP technology.

- Smart, compact and reliable
- Intuitive operation
- ScanX RFID IDX PSP Technology

ScanX Swift View 2.0

Ready for the dental practices of tomorrow

With innovative and practical solutions, Air Techniques has been pioneering and shaping the field of dental imaging for over six decades. The new ScanX Swift View 2.0 continues to carry in that tradition. Bringing flexibility and ease of use thanks to our extremely thin and flexible IDX PSPs, combined with the help of Artificial Intelligence (AI) to meet all your intraoral diagnostic imaging needs. In conjunction with the optional ScanX Smart Reader, workflows can be easily automated. Together with superior image quality, the ScanX Swift View 2.0 makes your dental practice sustainably ready for the future, while bringing diagnostic efficiency and reliability to the next level, today.

- High-resolution image quality for easier diagnostics
- New "Easy Feed" concept for all intraoral formats (0, 1, 2, 3, 4) IDX PSPs
- High-resolution glass touchscreen display
- Smart Scan workflow
- Packed with intelligent workflow automation functions in combination with ScanX IDX PSPs and VisionX AI software

ScanX Duo Touch

A Great Feeling of Efficiency and Reliability

Air Techniques IDX PSP technology makes it very easy to switch to a digital workflow, thanks to the wide range of formats, the ScanX Duo Touch allows you to process on a single device.

- High resolution image quality for easier diagnosis
- 2 slots for efficient workflow
- For all intraoral formats (0, 1, 2, 3, 4) IDX PSPs
- High-resolution glass touchscreen
- PC connection via WiFi/LAN/USB
- AI: Automatic image rotation with VisionX
- Preview and view W-ray images
- Easy to clean and disinfect
- Intuitive controls

ProVecta HD

AIR
TECHNIQUES equipped for life

Perfect in Function

DC tube with a 0.4 mm focal point for unsurpassed image resolution

While most X-ray units have a 0.7 mm focal point, the ProVecta HD features a 0.4 mm focal point for maximum image sharpness.

The smaller the focal spot, the greater the contrast resolution, which provides sharper edge definition and finer details of internal structures.

Other reasons for exceptional precision:

- Generator head handle allows **precise positioning** that stays in place.
- Right-angle/parallel technology for **precise alignment**.
- Adjustable **mA and kV** levels.
- Optional **rectangular radiation field collimator**.
- DC technology allows **constant radiation** levels to ensure reliable image quality.
- **Factory programmed** dosage specifically set for each view of teeth when using ScanX[®] flexible phosphor plates (PSPs).

The ProVecta HD works with wired sensors, cordless flexible phosphor plates (PSPs) and film.

ProVecta 3D Prime

Taking diagnostics to the next level ProVecta 3D Prime combines diagnostic flexibility, ease of use and lower radiation dose.

The ProVecta 3D Prime generates a unique 130mm x 85mm jaw-shaped anatomically adapted volume that encompasses all treatment areas without imaging non-relevant anatomy.

- 3D and 2D images from one unit
- Anatomically adapted jaw-shaped 3D image includes all dentition, including third molar area
- 50 x 50 mm volumes in 80 or 120 µm Voxel size
- High resolution CsI flat panel sensor creates brilliant high quality 3D and 2D images
- Efficient radiation dose thanks to the anatomically adapted volume and sensor technology
- Great quality with lower dose in standard (SQ) mode
- Metal artifact reduction
- Intuitive 7" touchscreen
- Fast scan and volume rendering
- Includes VisionX Imaging software: an all-in-one, easy-to-use imaging software suite. Implant visualisation included. Advanced planning and additional modules optional.

Intuitive touchscreen: All functions at your fingertips

The innovative 7" touchscreen provides clear text and symbols to guide you through all functions while the patient is in front of you. This ensures correct patient positioning and fewer retakes.

Simple face-to-face patient positioning

Triple laser alignment for 2D scans, and double laser alignment for 3D scans simplifies patient positioning and speeds up overall imaging time.

Efficient design minimizes space requirements

The efficient and modern design makes it easy to fit into a variety of existing spaces.

C50 FULL HD CAMERA

Your view.
Where others
can only imagine

Remarkable clinical vision

The intraoral camera C50 leverages full HD imaging expertise, offering you a more precise and sharp technology, producing higher quality images, combined with outlanding ergonomics to make your image acquisition as easy as possible.

Remarkable clinical versatility

Accomplish a more efficient and performant clinical evaluation thanks to our ergonomic 4 in 1 diagnostic aid camera. In one click, switch from Daylight vision mode to Daylight+, Perio or Cario vision mode.

Remarkable operational freedom

Free yourself from constraints thanks to user-friendly device: 100% compatible with your current configuration. With embedded drivers, the camera does not require any installation.

FULL HD

Clear and detailed images

- A more **confident** final diagnostic
- Increased case **acceptance**

VISION MODE

Transcript of natural colors

- **Straight forward** patient education
- Great for comparing teeth stain and **sharing it with patient**

AUTO FOCUS

Gain of time & better image clarity

- **Ease of use** for the clinician
- Improved **patient comfort**

- **Easier** clinical evaluation
- **Enhanced communication** between clinician and patient

MACRO VISION

More visibility of fissures & caries

Preva DC Intraoral X-Ray

The Preva is the imaging workhorse of the dental office, used to detect cavities or other problem areas. With exceptional image quality and proven mechanics, Preva units are a pleasure to operate with seemingly effortless movement and drift-free positioning.

Image Clarity

Preva provides a 0.4-mm focal spot for sharp, well-defined details that allow easy identification of pathology with both film and digital sensors.

Ease of Use

The easy-to-use LCD control panel display with large icons helps to identify target tooth, receptor type and patient size while also offering 30 pre-programmed technique settings.

Drift Free

The proprietary dual-arm braking system helps the head stay exactly where you position it without sagging or drifting.

Ergonomic

The Preva system is designed for effortless movement and fast one-handed positioning.

Technical Specifications

Line voltage: 110-230 VAC +/- 10% 50 or 60 Hz

Tube potential: 60, 65 or 70 kVp

Tube current: 4, 5, 6 or 7 mA

Exposure time: 20 ms to 2 seconds

Cone length: 20 cm (8")

Focal spot: 0.4 mm (IEC 60336)

Duty factor: 1:15

Shipping weight (wall mount): 95 lb

Applicable regulations compliance: 21 CFR, UL, IEC

Warranty: 2-year limited

Options: Exposure hand switch; 12" cone; 8" rectangular cone; Choice of 56", 66", 76" or 82" (total reach); Two-stud mounting plate; Metal stud-mounting plate

U-SENSE

Leveraging a wide experience in all sectors of dental radiology, ACTEON expands its product portfolio with U-SENSE, a new high-tech intraoral sensor providing versatility, reliability in image quality and ease of use in the daily workflow. The multi-layer technology of U-SENSE, which combines optical fibers, scintillator and shock absorption area, is the core of its strong and reliable structure, ideal for long-lasting performances.

EASY HANDLING AND USABILITY

The rounded corners of U-SENSE are designed to improve patient's comfort, a key component for reliability in diagnostic. The USB direct connection to the PC, working without any intermediate electronics, combined with a fast acquisition time (3s) make U-SENSE a real plug & play tool for instant diagnosis.

STRIKING CONTRAST FOR RELIABLE DIAGNOSIS

2 FIBER PIXEL

The optical microfiber guided transmission of photons is the core of U-SENSE and U-SENSE HD multi-layer technology, always providing low noise and high contrast images.

WITHOUT FIBRE

WITH FIBRE

Displaying the region of interest with outstanding sharpness is matter of seconds

HIGH-QUALITY IMAGES FOR ANY CLINICAL NEED

25
lp / mm

U-SENSE and U-SENSEHD come in two different sizes. The active area of 200x300 mm corresponding to the size 1 it's suitable for pedodontics, periapical and endodontics images, while the 260x340 mm of the size 2 are ideal for occlusal and bitewing examinations. With its resolution of 25 lp / mm the HD version further provide high quality images ensuring accuracy and reliability in diagnostics.

1

2

Scale 1:1

BITEWING

Visualize the crowns of the (posterior) teeth and the height of the crestal margin in relation to the cemento-enamel junction to evaluate the periodontal tissue.

PERIAPICAL

Anterior and posterior teeth from crown to root.

ENDODONTIC

Intraoral examination taken during the canal treatment on a patient.

POSTERIOR

Intraoral examination similar to periapical, but taken only in the region of the molars and with closed mouth.

MAKE PROCEDURES COMFORTABLE

U-SENSE and U-SENSE HD 's rounded corners are designed to improve patient's comfort, a key component for ensuring accuracy in diagnostic imaging.

x-mind prime 2

Easy Acquisition Effective Workflow

- X-MIND® prime has been engineered to make your daily operations faster and more efficient.
- Its effortless and lightweight wall mounting solution, allows to quickly install it almost everywhere, ensuring the maximum accessibility in any context, for both standing or sitting patients.
- Its clean and neat user interface with finely designed workflows is intended to fulfill your daily tasks with the minimum number of steps, to take you straight to the result.
- Easy. Effective. Simply X-MIND® prime.

What's new on X-MIND Prime 2?

On X-MIND Prime 2 we have introduced:

- a new overall pleasant design with improved usability and reliability of the mobile sensor.
- a new redesigned user interface improved in usability.
- a new 3D panel with an improved resolution of 72.5 µm.
- a new filter for metal artifacts compensation improved in performances (SMAR-T) a new 12x10 cm FOV improved in quality.
- a new imaging software AIS 5 improved in usability and capabilities.
- a new software CM-Suite developed to significantly simplify the post installation processes and the device maintenance.

Vatech VSP Phosphor Plate Scanner

vatech

Digital scanner with image boards, ergonomically designed, compact and easy to use. It provides high quality images necessary for an accurate and efficient intraoral diagnosis, even in the doctor's office. The device has a built-in 4-inch touchscreen display and allows optimal preview of images. The boards are available in four sizes, thin and flexible, with 100% optimised active display surfaces, allowing reuse over time and maintaining a high quality image. Ethernet cable connection that allows fast image transfer from scanner to PC. Dimensions: 233x141x191 mm, weight 3.3kg. 24 month warranty.

Vatech 3D Intra-Oral Scanner

EXPAND YOUR DIGITAL WORKFLOW

Quick Scan Time for Workflow Efficiency

- Full arch scans in under 2 minutes from start to finish

Simple and Intuitive Interface for an Improved Scanning Experience

- Clear and intuitive interface for ease of use
- Essential functionality for many treatment plans

Case Sharing

- EzScan Cloud is an easy-to-use file-sharing module for sharing digital impressions with the lab of your choice

Open Platform with No Continued Fees

- Easy to export to your treatment planning software or to send it to the lab of your choice.
- Maximize your ROI with no continued fees.

Vatech EzSensor Classic

- Ultra-Slim for Easy Positioning
- Patient Oriented Design
- Trustworthy Image

ULTRA-SLIM FOR EASY POSITIONING

Slim, CMOS ensures that patients are as comfortable as possible.

PATIENT ORIENTED DESIGN

Rounded corner design allows maximum comfortable placement against soft tissue.

TRUSTWORTHY IMAGE

EzSensor Classic provides the image for accurate diagnosis and treatment planning.

Vatech EzSensor HD

vatech

- 33.78 lp/mm Experience the High Resolution
- EzSensor HD will upgrade the existing intraoral sensor standards.
- Innovation in Durability - upgraded usability and raise value
- Complete Protection Against Dust and Water

How did we create such a high quality sensor?

- New image processing algorithm applied
- Well balanced imaging factors - resolution, sensitivity, and noise
- In-house manufacturing components (from CMOS design to viewer software)

Vatech EzRay Air Portable

- It all starts with weight innovation
- Double scatter shield in one
- Smart angulation for optimal results
- One dial for all function

WEIGHT INNOVATION: 1.4 KG

EzRay Air Portable Type, a light portable X-ray with 1.4kg, makes stable condition for positioning the device. It satisfies all primary dental diagnostic needs by creating stable and clear images at all times.

ESSENTIAL SAFETY: DOUBLE PROTECTION DESIGN Internal Shielding

The internal radiation shielding is perfectly designed to protect the operator from leakage radiation.

External Backscatter Shielding

The backscatter shield significantly reduces the operator's radiation dose.

Vatech EzRay Air Wall

- Smart angulation for optimal results
- Intuitive & convenient operating panel
- One dial for all function
- 2.4kg lightweight tube head for stable, safe use
- Compact design for easy use

SECURE CLEAR IMAGES WITH A 0.4MM FOCAL SPOT

Regardless of which intraoral sensor you use, the EzRay Air minimizes blur and provides additional diagnostic value with a 0.4mm focal spot.

ERGONOMIC DESIGN FOR SAFETY AND EFFICIENCY

Vatech 2D PaX-i

- Superior image quality
- Two dedicated sensors
- Modern compact design

THE ADVANCED IMAGING SOLUTION FOR ACCURATE DENTAL DIAGNOSIS

The PaX-i provides the most precise and high quality panoramic images by combining image processing and accumulated experience in dental imaging from Vatech.

This will increase your diagnostic accuracy for improved treatment planning and patient satisfaction.

Vatech 3D PaX-i3D Green

vatech

THE NEW DIGITAL ENVIRONMENT IT'S YOUR PRIDE, GREEN INNOVATION

PaX-i3D Green produces superb diagnostic images, which will be a source of pride for any dental practice, and improves the health and safety of your patients.

Experience excellent image quality with VATECH's advanced technology.

Vatech PaX-i Insight

BEYOND 2D, DEPTH ADDED PANORAMA

Insight Pan

- The next evolutionary step forward in panoramic imaging with Insight Pan

Rapid Ceph

- 1.9 second acquisition time produces superb image quality
- Reduced motion artifacts and faster workflow

User Friendly Ezdent-I Software

- Powerful diagnostic value with Insight feature
- Complete solution for consultation
- Easy to learn, easy to use

Vatech A9

A NEW DIMENSION BEYOND YOUR EXPECTATIONS

The Vatech A9 provides the most precise and high quality panoramic images by combining image processing and accumulated experience in dental imaging from Vatech. This will increase your diagnostic accuracy for improved treatment planning and patient satisfaction.

vatech

Receive a free intra-oral x-ray when purchasing an OPG or CBCT unit!

Vatech 3D Smart Plus

SMART INNOVATION

The innovative FOV of the Smart Plus provides an arch-shaped volume, which shows a wider view of dentition compared to other devices of the same FOV. Normally, a FOV 10x8.5 image shows tooth #8. However, when the tooth is lying on its side, there is a high possibility that the tooth will be cut out of the image. The "arch-shaped volume" eliminates this possibility and shows the hidden dentition area.

Vatech 3D Green X 12

- 3rd generation compressed sensing technology
- Highest resolution with 0.05 mm voxel size
- One scan, two images
- 3D scanning for model

Vatech dramatically improves its image quality with much less artifact and noise via its Compressed Sensing Technology (CST), iterating its reconstruction process 10 times more than the normal amount to depict the object's true representation.

Vatech 3D Green X 18

GREEN INNOVATION FOR THE NEXT GENERATION

Green18 is an advanced 4-in-1 digital X-ray imaging system that incorporates PANO, CEPH (Optional), CBCT and MODEL Scan. It provides high quality images with lower radiation by combining imaging processing and accumulated experience in dental imaging from VATECH. This will improve your diagnostic accuracy with increased treatment planning and patient satisfaction.

Vatech 3D Green X 21

- Powerful dental diagnostic value with 3D images
- The optimal solution for ENT diagnosis
- Professional diagnostic value with panoramic images

RASING THE BAR FOR EXCELLENCE VATECH'S NEW PREMIUM SOLUTION

Multi-modality CBCT, most comprehensive set of FOV sizes collimated from 21x19 down to 8x8, to provide a whole array of diagnostic tools to the discerning clinicians.

PIEZOTOME

CUBE

Product Code: F50102

Piezotome Cube comes with the following:

- 1 X Cube LED HP
- 1 X Essentials Kit
- 1 X Dynamometric Wrench
- 1 X Multifunction Footswitch
- 1 X Irrigation Bracket
- 1 X Handpiece Holder
- 2 X Autoclavable Irrigation Lines
- 5 X Autoclavable Irrigation Clips
- 15 X Sterile Perforators

The new gold standard in dentistry

v.Prof. Dr. A. Troedhan (Austria)

EXPAND YOUR EXPERTISE

CHOOSE THE REFERENCE

Surgeons and patients come together to universally recognize clinical benefits of ultrasonic bone surgery. Piezotome becomes the most globally trusted brand to perform delicate bone surgeries.

GIVE VALUE TO YOUR TREATMENTS

Piezotome Cube unmatched performance combined with the practitioner's clinical expertise paves the way for accurate, faster and atraumatic surgical procedures.

GIVE THE BEST TO YOUR PATIENTS

Improving patient care is our priority. Piezotome surgery outclass traditional instruments with surpassing healing, significantly less swelling, pain and complication in the clinical follow-up.

When compromise is not an option, Piezotome Cube is the easy way to give more to your practice and patients.

Product Code: F27203

LED Implant Centre comes with the following:

- LED motor
- LEDD motor cord
- Progressive footswitch
- 2 brackets
- 2 handpiece holders
- Australian power supply
- 2 sterilisable irrigation lines
- 30 perforators

THE ALLIANCE OF TECHNOLOGIES

The Implant Center 2 combines, in a complete table-top unit, the most advanced ultrasonic and rotary technologies, ensuring total independence in increasingly diverse clinical areas.

Micro-motor LED

- Durable, precise and silent
- Fully sterilisable
- Corrosion resistant (induction)
- No lubrication needed

Customisable

- Four pre-set easily customisable programs
- Intuitive settings can be quickly adjusted during surgery

Variety

- Compatible with all light and regular contra-angles on the market (E-type - ISO 3964 connection)
- High torque and wide speed range for all kinds of treatment
- Ready for implant, perio and endo contra-angles

Stability

- Perfect balance between torque and speed for unmatched stability
- Maximum torque: 6Ncm up to 24,000Rpm
- Maximum torque at instrument end (20:1): 120Ncm
- Motor speed: 100 - 40,000Rpm

SERVOTOME Electrosurgery • Unit

Product Code: F57230

Servotome comes with the following:

- single footswitch
- a box with 10 electrodes
- conductive bracelet
- Australian power supply

INCISION & COAGULATION

30 watts is enough for greater efficiency.

Technological performances

- ☐ Controlled power
- ☐ Reliable and reproducible setting
- ☐ Safer with maximal efficacy
- ☐ Less energy loss

Controlled power for all electrosurgical applications

- Incisions/Excisions
- Frenectomy
- Gingivoplasty
- Coagulation
- Abscess incision
- Exposure of impacted/retained teeth
- Gingivectomy
- Etc.

Conductive bracelet

ACTEON®'s choice for a bracelet system is the best compromise for safety and convenience:

- ☐ Easy to install to enhance patient acceptance
- ☐ In direct contact with the patient's skin
- ☐ Easily disinfected
- ☐ Adjusted to a contact region with a low resistance
- ☐ Perfect size to avoid concentration of heat
- ☐ More security: in compliance with new standards

Reliable and compact unit

- ☐ Very compact
- ☐ User-friendly for a fast setting up
- ☐ Only two potentiometers (incision and coagulation)
- ☐ Settings can be very finely adjusted according to the different types of tissues encountered

Electrode holder

- ☐ Light and autoclavable
- ☐ Simple-to-mount electrodes
- ☐ The electrode is insulated by a sheath, only the active part is in contact with the soft tissue

POWER EDITION

NEW

High-performance handpieces for high-strength materials

The Synea Power Edition is especially designed for heavy-duty applications, such as the removal of decayed materials, cavities, fillings, crowns, and bridges. These new high-speed contra-angle handpieces with a unique black push-button are built extra strong and durable. They are the optimal solution for advanced ceramic material like zirconia that is increasingly being used in restorative dentistry. Thus, this up-to-date addition to the Synea family is the perfect complement to your existing handpiece range.

Piezo Scaler with first-class performance

The W&H ultrasonic scaler stands out for its fast removal of calculus and gentle, minimally invasive application. It offers optimal comfort and is flexible in its use thanks to the efficient W&H tip system. State-of-the-art piezo technology improves efficiency and tactile feedback in all clinical indications.

W&H tip system

The tip system, developed with end users, is perfectly matched to the requirements of the respective application areas and the individual treatment steps.

Maximum efficiency

High-performance and gentle at the same time for a minimally invasive application and painless treatment.

Easy to clean

Both Piezo Scaler handpieces can be easily dismantled for simple and improved cleaning and both are thermo washer disinfectable and sterilizable.

Handy and comfortable

The shape of the handpiece and its light weight ensure maximum comfort.

5x ring LED

Daylight-quality illumination of the treatment site thanks to 5 LEDs with the PB-3 LED handpiece.

Useful accessories

Change tips simply and safely with the tip changer and check them using the tip card.

Treatment site always cooled

The integrated spray ensures constant and effective cooling of the treatment site.

W&H Piezo Scalers

The W&H Piezo Scalers can be optimally integrated into your personalised workflow. Choose the exclusive stand-alone solution Tigon+, a Proxeo Ultra Piezo Scaler or take advantage of a Built-in Solution – convenient integration in your dental unit.

Tigon+

Exclusive stand-alone solution with warmed fluid for maximum patient comfort.

PB-530

The W&H Piezo Scaler with wireless foot control for increased freedom of movement and the ultimate in user comfort.

PB-520/PB-510

The compact models of the Proxeo Ultra Piezo Scalers are certain to be a hit with or without a tank.

Built-in Solution

Selected unit manufacturers offer W&H Piezo Scalers as an integrated drive solution as part of the complete system. They can be controlled simply and conveniently via your dental unit's control panel. Ask W&H or your unit manufacturer about W&H Piezo Scalers as a Built-in Solution.

Diverse range of uses

Thanks to infinitely variable power regulation the W&H Piezo Scalers can be effortlessly adjusted to the particular application and tip. From prophylaxis and periodontology to implant maintenance or endodontics right up to the micro-preparation of restorations, they boasts a particularly diverse range of uses.

The new generation of rotary polishing

proxeo TWIST LatchShort Polishing System

W&H Proxeo Twist
Product Code: WP-66 W

It's in your hands

Whether you are working supragingivally, in the sulcus or in deep pockets, the combination of the right powder, the corresponding setting on the adjustment ring and the matching spray head ensures you always achieve optimal treatment results.

Main advantages at a glance

- Practical adjustment ring for simple switching between prophylaxis and periodontal treatments
- 2 different powder for a wide range of indications
- Optimally bundled powder jet for controlled spray pattern and less powder emission
- Spray attachments with different angles and in different lengths for optimal access
- Special periodontal accessories for thorough treatment of deep pockets
- Clear powder container with lateral opening for easy refilling and simple checking of powder level
- Range of turbine connections – suitable for all devices

Osstell Beacon

Go from Good to Great

The Osstell Beacon tells you when an implant is ready for loading in a matter of seconds.

- Manage patients with risk factors
- Avoid unnecessarily long treatment times
- Achieve more predictable outcomes

The Osstell Beacon also gives you **free access** to OsstellConnect, where you can analyze your data, keep track of healing times and success rates over time, and compare your clinic with data averages from other Osstell users all over the world.

Simply a tool to help you excel.

Product Code: 103000

The ISQ Scale

The Osstell Beacon uses proprietary and evidenced-based RFA technology, based on more than 900 scientific studies. Visit osstell.com/clinical-guidelines to learn more.

The new solution in the Zygoma application

Unique,
easy and safe

The specially for the insertion of Zygoma implants developed 20:1 handpiece facilitates the work of the surgeon. The angulation is unique and allows a much better view of the treatment site. So the surgical procedure is also possible to difficult accessible positions in the zygomatic bone.

Easy access to treatment site

The angle of the handpiece allows optimal access for difficult interventions in the area of the zygomatic bone.

High application security

The world's only 20:1 handpiece with contra-angle chucking system ensures application security at high concentricity.

Fatigue-free working

The ergonomic design of the handpiece ensures long and fatigue-free working.

Efficient cooling

The spray exits near the instrument's area of activity and cools the operating site extremely efficiently.

SZ-75 Zygoma handpiece

Product Code: 30095000

NSK Create it

NSK PRECISION TECHNOLOGY

NSK Cellular Glass Optic

Cellular Glass Optic delivers brilliant illumination, is highly durable and will not deteriorate due to repeated sterilisation.

NSK Ceramic Bearings

Ceramic Bearings are 25% harder than conventional steel bearings but are only half the weight. Because frictional wear between the ball bearings and the bearing retainer is significantly reduced the efficiency and durability is significantly increased.

NSK Clean Head System

The patented NSK Clean Head System is a special mechanism designed to automatically prevent the entry of oral fluids and other contaminants into the handpiece head prolonging the life of the bearings.

NSK Push Button Chuck

Push Button Chuck is NSK's original push button auto-chuck mechanism that tensions the bur grip during rotation. It allows one-touch bur insertion and removal without tools. The bur lock mechanism is designed so that bur retention strength increases when high loads are applied to the bur.

NSK Quattro Water Spray

The NSK Quattro Water Spray effectively cools the entire surface of the bur with a high cooling effect, leaving no areas untreated.

NSK Non-Retraction Valve

The Non-Retraction Valve is integrated inside the coupling, plus inside air motors. It prevents retraction of contaminated fluids into the handpiece water lines. In combination with the Clean Head System, the Non-Retraction Valve provides an effective method to effectively reduce possible internal contamination.

NSK Ergonomic Comfort Grip

NSK is dedicated to designing handpieces that adapt comfortably to the human hand form, even during extended treatment periods. This is relevant to all hand sizes. Titanium is the optimum material to especially offer lightweight comfort, tactile sensitivity, and the ideal grip texture even for gloved hands.

NSK Scratchless DURAGRIP

Special surface processed body pursuing usability and operability is designed to improve comfortability of holding while equal scratch resistancy as DURACOAT is maintained.

NSK Scratchless DURACOAT

DURACOAT, NSK's latest surface enhancement technology, takes advantage of the non allergic and biocompatible properties of titanium to further improve durability. DURACOAT creates a smooth, scratch resistant surface which is comfortable to hold.

Autoclavable

All NSK handpieces offer superior durability and continued performance, even when frequently autoclaved. All handpieces may be autoclavable up to 135°C.

Thermo-disinfector Ready

Disinfecting handpieces prior to autoclaving is a recommendable practice for more effective infection control. The symbol mark on your NSK product means you can cleanse and disinfect the handpiece using a thermo-disinfector.

44W of unprecedented power.

NEW Ti-Max Z Series Air Turbine Handpieces

Z990L/Z890L

Experience like never before, the unprecedented power of the industry's best-in-class 44W air turbine handpiece as it delivers powerful cutting strength.

It makes zirconia removal easy, reducing chairside time and minimising patient discomfort.

DYNAMIC POWER SYSTEM

The "DYNAMIC POWER SYSTEM" has been developed using the latest fluid simulation software. This enables efficient conversion of air into power to achieve a significant increase in power from 26W to **44W***. Makes zirconia removal easy, reducing chairside time and minimising patient discomfort.

*Z990L, Air pressure at 0.42 MPa.

DURAPOWER CHUCK

NSK's proprietary technology enhances the chuck function. The wedge-shaped part grips the bur firmly with force generated by the wedge effect.

100° angled head

Considering the physiological curves of the oral cavity (Curve of Spee and Curve of Wilson), the 100° angled head enables easier access and high-torque cutting for efficient treatment in the oral cavity.

Quick Stop Function

The Quick Stop Function stops high speed rotation in around 1 second. It improves safety in the oral cavity by halting drill spin. The result is efficient, high speed cutting and incredibly safe surgeries.

DURAGRIP coating

The surface of the pure titanium body is blasted to eliminate shiny surfaces by producing micro surface unevenness, and then coated in our original "DURAGRIP" coating. As well as improved scratch resistance and durability, the uneven surface ensures a comfortable, non-slip grip.

Easily replaceable cartridge

The cartridge can be easily replaced by the user, eliminating time lost from sending the handpiece in for repair and ensuring a consistently good treatment environment.

Microfilter

Equipped with built-in water filter. The 0.3 mm diameter mesh water filter prevents foreign matter from entering the water line, reducing problems of clogging.

DualDefense®

Proprietary Infection Control by NSK

NSK instruments are designed with DualDefense infection protection. The Clean Head System prevents suck-back into the head and the exhaust line and the Anti-Retraction valve prevents contamination of the water supply.

Air Turbine & Coupler

Clean Head System

Anti-suck back system prevent cross contamination of the air lines

Anti-Retraction Valve

Anti-Retraction systems prevents cross contamination of the water lines in High-Speed Air Turbines and Electric Micromotors.

MULTI PAD

The NSK Multi Pad uniquely enables control of the NLX nano and NLX plus electric Micro Motors and also the Varios 170 ultrasonic scaler – all in one system.

When partnered with Multi Pad, the NLX plus reaches speeds of 100 – 40,000 min⁻¹ and delivers up to 4 Ncm torque, whilst offering three user-friendly endo modes; auto-reverse on, auto-stop and auto-reverse off.

NSK's Multi Pad can also be used to control all functions of the Varios 170 ultrasonic scaler. The Multi Pad auto selects the motor or scaler in use. At the touch of a button control speed, torque and gear ratios to suit specific clinical procedure. The Multi Pad can store up to eight individual programs (motor only). NSK Multi Pad is designed to integrate into most brands of new or older dental units.

Varios Combi Pro

Two Maintenance Systems in One

Combining ultrasonic scaling and powder therapy for more effective and comfortable oral hygiene and biofilm control.

Incorporating the Advanced iPiezo Engine

The iPiezo engine easily and comfortably removes both soft and hard calculus by powering the tip according to the applied pressure. The ultrasonic engine features state-of-the-art software to maximize performance while minimizing patient discomfort.

Powder Therapy to Clean Supragingival Areas Efficiently and Quickly

NSK's expertise in fluid analysis techniques, gained through developing turbines, optimize powder flows inside the chamber, streamlining sprays of powder, water and air to significantly shorten chair times.

FLASH PEARL

AIR POLISHING POWDER

CALCIUM BASED, SPHERICAL PARTICLES

Suitable for all brands of air polishers

FLASH pearl granules are small and spherically shaped compared to particles of sodium bicarbonate powder. This means more contact and better access to clean all target areas effectively.

A wider working angle also provides greater treatment safety. The spherical shape of FLASH pearl gives a smooth finish to tooth surfaces compared to the effects of the sharper-edged particles of sodium bicarbonate. FLASH pearl leaves teeth sparkling without damaging dental enamel.

NSK Create it

FEATURES:

- 4 bottles packed in a box
- Each bottle contains 300 gms
- Comes with a measuring cup for your convenience
- Safe for patients suffering high blood pressure
- Natural taste – sodium free
- Prevents handpiece from clogging
- Quick and powerful stain removal
- Does not damage the tooth's surface

MODEL: FLASH PEARL

(4 x 300 G BOTTLES)

ORDER CODE: Y900698

SPHERICAL GRANULES REMOVE RESIDUES FROM EVERY CORNER

FLASH pearl granules are small and spherically shaped compared to particles of sodium bicarbonate powder. This means more contact and better access to clean all target areas effectively. A wider working angle also provides greater treatment safety.

FLASH PEARL

CONVENTIONAL SODIUM BI-CARBONATE POWDER

FLASH PEARL ROLL SMOOTHLY OVER TOOTH SURFACES

The spherical shape of FLASH pearl gives a smooth finish to tooth surfaces compared to the effects of the sharper-edged particles of sodium bicarbonate. FLASH pearl leave teeth sparkling without damaging dental enamel.

FLASH PEARL AVOIDS SURFACE DAMAGE

CONVENTIONAL BI-CARBONATE IS AGGRESSIVE

PROPHY-MATE NEO

AIR POLISHING SYSTEM

APPLICATIONS:

- Removal of plaque and discolouration
- Preparation for pit and fissure sealant
- Etching of enamel, dentine and porcelain prior to bonding
- Preparation for pit and fissure sealant

ADVANTAGES:

- Simple to operate
- Easy maintenance
- Sturdy and reliable
- Quick connect to major brands of turbine couplings
- Comes with 60° or 80° nozzles

FOR NSK COUPLING
MODEL PMNG-PTL-P
ORDER CODE: Y135029

AVAILABLE TO FIT KAVO®,
SIRONA®, W&H®, BIEN-AIR®

PERIO-MATE BIOFILM ERASER

Perio-Mate is used in the treatment of periodontal pockets and peri-implantitis. Avoiding injury to the soft tissues and root surfaces inside delicate periodontal pockets during cleaning procedures is crucial. The Perio-Mate ultrafine water spray and glycine-based Perio-Mate Powder match to gently eradicate biofilm in periodontal pockets in just 20 seconds. The combination of Perio-Mate slim nozzle and fine, thin and flexible plastic nozzle tips make procedures safer while offering optimal visibility.

ADVANTAGES:

- Innovative nozzle tip
- Precise, flawless powder flow
- Maintenance
- Powder control ring
- Slim Nozzle Design
- Smooth 360 degree rotation

FOR NSK COUPLING

MODEL: PER-PTL-P
ORDER CODE: Y1002654

AVAILABLE TO FIT KAVO®,
SIRONA®, W&H®, BIEN-AIR®

Perio-Mate

FLEXIBLE PLASTIC NOZZLE TIP DESIGN ENSURES ACCESSIBILITY AND IS GENTLE TO THE POCKET

The slim nozzle tip possesses just the right degree of flexibility to pass smoothly over tooth surfaces, and can be easily inserted into tight pockets and the root surfaces of adjacent teeth without causing the patient discomfort.

SLIM NOZZLE FACILITATES OPERATION IN THE NARROW CONFINES OF THE ORAL CAVITY

The long, narrow nozzle shape is designed to allow easy access to areas that require inserting the handpiece at an angle, such as between molars.

OPTIMIZED NOZZLE DESIGN BASED ON FLUID ANALYSIS ENSURES FLAWLESS POWDER FLOW IN THE POCKET

NSK's analysis of fluid dynamics gained through years of experience in developing turbine technology fully takes into account how a clinician must maneuver in the limited space inside the pocket.

SMOOTH 360-DEGREE ROTATION FOR SAFE AND ACCURATE OPERATION

The handpiece can easily be rotated using the fingertips even while performing complex operations. The nozzle tip allows easy access to difficult to reach areas, and does not adversely affect neighbouring teeth and contours.

POWDER CONTROL RING

The Perio-Mate's convenient Powder Control Ring makes fine-tuning powder flow simple and intuitive with quick fingertip adjustments. In addition to easily controlling and stopping the flow of powder in this way, you can cleanse the treatment area from biofilm uninterrupted.

MAINTENANCE

The nozzle with its nozzle tip, handpiece and powder chamber can be easily dismantled for cleaning and decontamination.

PERIO-MATE POWDER

BIO FILM ERASER POWDER

Glycine-based, mean particle size <45µm.

FEATURES:

- 4 bottles packed in a box
- Each bottle contains 100 gms
- Comes with a measuring cup for your convenience

MODEL: PERIO-MATE POWDER
(2 X 160G BOTTLES)

ORDER CODE: Y900938G

NSK'S INNOVATIVE NOZZLE TIP

NSK's new nozzle tip design incorporates semitransparent materials that promote greater visibility during procedures. Hygienic single use tips mean enhanced usability and safety.

PACK of 40 Sterile Tips
ORDER CODE: Y1002741

Speeds indicated above correspond to micromotor speed selected.

Go beyond.

The new Surgic Pro2

Operability, safety and wireless extensibility: these are the crucial areas where the new Surgic Pro2 makes the difference. The NSK surgical micromotor system represents an extraordinary innovation, designed to give the best device, for the most effective, reliable and comfortable work experience.

There are so many good reasons to choose Surgic Pro2 – the progress, that lets you go beyond.

Improved operability/ usability
more compact motor offers more comfort, less stress.

Safe and sensitive display
easy-clean screen and adjustable smart touch panel, usable when surgical gloves and surgical barrier sheets are in use.

Wireless control pedal
to control irrigation flow selection, program selection rotation direction and rotation speed.

High-resolution colour LED light offers increased visibility, seeing blood and gingiva as if naturally lit.

Silent and smooth
irrigation pump.

High torque accuracy
made possible by the optimised torque calibration system (AHC). Offers maximum safety against exceeding torque during implant placement.

Enhanced decision making,
by offering predictability and control on when to load an implant, especially when a shorter treatment time is given – see Osseo 100+.

Bluetooth extensibility
to multiple devices - VarioSurg3, Osseo 100+, wireless foot control, iPads.

NSK
Create it

Surgic Pro⁺

SURGIC PRO FOR IMPLANT AND ORAL SURGERY

LED ILLUMINATION

Multi Function Brushless Surgical Micromotor with USB data storage facility. Intelligent, intuitive and accurate.

One unit for many surgical applications with USB port for easy data storage. Control unit with Advanced Handpiece Calibration (AHC) – High Torque Accuracy NSK Surgic Pro+ automatically calibrates the micromotor and the handpiece to the rotational resistance of each individual handpiece prior to operation. Surgic Pro+ offers speed and high torque accuracy for maximum safety during operation.

FEATURES:

- Powerful torque (up to 80Ncm)
- Wide speed range (200 to 40,000min⁻¹)
- High torque accuracy
- Lightest and smallest micromotor
- LED illumination (over 32,000LUX)
- Excellent durability
- Autoclavable, thermo-disinfectable and maintenance free brushless design

SURGICAL AND IMPLANTS VARIOSURG3 FOR PIEZO SURGERY

LED ILLUMINATION

Multi Function Piezo Electric Unit for Minimally Invasive Surgery

Sinus lifts, extractions and bone grafting are all too simple for this powerful and intuitive machine.

- Minimal invasive surgery. Eliminates heat and reduces bleeding during operation
- Ergonomics and visibility. Optic handpiece is lightweight and slimline
- Safe. Soft tissue damage is minimal even during accidental contact
- Accuracy and precision. Minimal blood during cavitation ensures a clearer surgical site

FEATURES:

- Major Power Boost
- 3 Modes (SURG, ENDO, PERIO)
- Selectable Burst Mode for added power
- 9 Programs (SURG x 5, ENDO x 2, PERIO x 2)
- Adjustable LED Light Intensity
- Automatic Cleaning Mode
- Feedback Function
- Auto Tuning Function
- Dynamic Link Feature

MAJOR POWER BOOST – UP 50 PERCENT

Capable of generating a maximum of 150 percent of the power its predecessor produced (in Surg Mode), the VarioSurg3 effectively shortens treatment time in combination with any of the sharp tips available.

*When setting power level more than 100 percent, please make sure to use tips that correspond to high power.

Osseo 100+

Removes Doubt

Osseo 100 measures implant stability and osseointegration to support decision on when to load an implant. Especially important when working with shorter treatment time or managing risk patients.

The uncomplicated procedure that measures ISQ allows the implant loading period to be planned in advance. The reconstruction of crowns and bridges can be monitored to optimize timing to decrease the risk for failures. Measurements can be made without unnecessary impact since the equipment does not come into physical contact with the implant or abutment.

Wireless connection with Surgic Pro2

Osseo 100+

Connectivity with Surgic Pro2

The ISQ value is transferred automatically when connected with Surgic Pro2. The Bluetooth® connection means that clinical procedures will be undisturbed.

Wireless data management

The measured ISQ can be shared and processed with data on external terminals via Surgic Pro2.

ISD900

Cordless Prosthodontic Screwdriver with Torque Calibration System (TCS)

NSK is introducing the iSD900 cordless screwdriver with Torque Calibration System (TCS) for prosthodontic screw fixing procedures. iSD900 will guarantee precise torque control due to the unique NSK torque calibration system which is extremely easy to use. The iSD900 will help to save time and allow precise risk-free tightening of screws. Clinicians can depend on iSD900 for safety and productivity.

ENDO-MATE AT

This compact endodontic motor has a wide range of torque and speed settings, allowing use Ni-Ti files from virtually all major manufacturers.

- Fits major brands of file
- Torque control, with integrated auto-reverse function
- Compact and stylish design desktop unit
- Large display screen provides high visibility
- Flat control panel allows simple and user friendly operation
- Lightweight, smart and high visibility handpiece.

Contents: Control unit, Motor handpiece, Contra Angle head (iFX75), handpiece stand, AC adaptor

MODEL: ENDO-MATE AT (230V)
ORDER CODE: Y1002190

iPEX II

PRECISION APEX LOCATER

- High-precision root canal measurement generated by using SmartLogic
- Auto-detects the apex accurately in any conditions, dry or wet
- A stylish and compact body requiring only a small space. It can even be located on the dental equipment console
- Three different alert sounds depending on the location of the file tip ensuring precise procedure
- A big three-colour LCD panel with very low reflectivity, allowing Clinicians to accurately and instantly monitor procedure progress
- Energy saving and low operation cost.

Contents: Control unit, IpeX II probe (1.8m), IpeX II File clip (3 pcs.), lip hook (3 pcs.), AAA manganese dry batteries (3 pcs.), IpeX II tester.

ULTIMATE XL

ULTIMATE XL SERIES

Ultimate XL series offers the choice of 4 control units for easy location in any available space, and to accommodate all user requirements. All functions are controlled by the NSK microcomputer which assures smoothness throughout all speed ranges including start and stop

FEATURES:

- Choice of Torque or Compact Micro Motor for any control system
- Ripple-free smooth rotation with 180° vector control system
- Powerful and stable torque across the entire speed range
- Ergo handpiece design for long term user hand comfort
- Lightweight compact handpiece body reduces hand fatigue and improves balance
- Unique dust-proof mechanism prevents internal contamination and premature wear
- Minimal vibration and noise from hermetically shielded micro motor
- 30% increased chuck strength enables application for a wide variety of materials

Dentalone

DENTALONE PORTABLE UNIT

Dentalone is the dentist's office mobile cart easily expandable from 'carry' position to a comfortable, user-friendly dental treatment cart ready to use anywhere, anytime.

Dentalone offers a large range of instruments and extended functionalities, thus practitioners can realise dental treatments outside any dentist's office.

FEATURES:

- Compact
- Simple to use
- Mobile
- Plug and play system
- Easy to carry
- User-friendly
- Extensible to Cart function
- Large range functionalities

CONTENT:

- Illuminated LCD control panel
- Brushless NLX nano micromotor with LED Light
- Integrated Multi Function Ultrasonic Scaler Varios 170 with LED Light
- Syringe with air/water/spray with LED Light
- Cannula for saliva
- Water tank for spray
- Tank for vacuum
- Built in compressor
- Built in suction pump
- Variable foot-control

MODEL: DENTALONE
ORDER CODE: S9070

VIVAMATE G5 PORTABLE UNIT

VIVA MATE G5

NSK Create it

FEATURES AND CONTENT:

- Speed: 3,000-30,000 min⁻¹
- Portable and compact unit, weighing 370g
- Capability to connect to external water supply
- Micro-motor with LED light
- Equipped with rechargeable battery and power cord
- Optional Foot Control
- Torque is 3 Ncm (30,000 min⁻¹ while rotating)
- Dimensions Unit: W72, D180 x H36 (mm)
- Complete system includes: Control unit, handpiece stand, motor with motor cord, AC adaptor, AC cord and carrying case

BENEFITS:

- Ability to use as a portable or benchtop unit
- Battery has a drive time of approximately 1 hour of continued use and 2 hour recharge time
- Suitable for denture adjustments and general applications
- Simple to use operation
- When operated via the foot control operator is able to use in auto cruise mode

VIVAMATE G5 PORTABLE UNIT

MODEL: VIVAMATE G5

ORDER CODE: Y1002801

VIVA ace

As we live in unprecedented times, the VIVA ace offers the opportunity to visit and treat shielded patients.

It is also perfect as a surgery back up, as clinical time will soon to be even more valuable as we move forward.

VIVA ace mobile dentistry system

ORDER CODE

Y1004228

- Portable (only 8.6kg) dental treatment centre
- Lightweight micromotor with additional endo functions
- Multipurpose ultrasonic handpiece
- Quick setup and storage
- 4-level adjustable height and angle

EXCLUDES HANDPIECES

iCARE

iCare sets a new standard for handpiece maintenance systems. In one stylish and compact system it offers both ease of use and multiple functions to assure ideal cleaning and lubrication.

The correct solution volume is preset based on handpiece type, and maintenance is initiated at the touch of a button. The chuck cleaning system keeps chucks pristine, and the purging select mode allows purge time to be adjusted depending on the situation for truly comprehensive maintenance.

Thanks to its stylish and compact body, iCare is also space efficient and is harmonious to the clinical practice environment.

iCare automatically cleans and lubricates up to four handpieces in less than two minutes.

The full 1.2 litre integrated solution tank is sufficient for up to 5,000 individual handpiece maintenance cycles.

MODEL: iCARE C2
ORDER CODE: Y1002787

MODEL: iCARE C3
ORDER CODE: Y1002788

ROTATIONAL MAINTENANCE SYSTEM

A major advantage of rotation during the cleaning process is the saturation of all internal components.

HIGH SPEED HANDPIECES

LOW SPEED HANDPIECES

PANA SPRAY PLUS (500ML)

PANA SPRAY Plus is a specially formulated, highly effective general handpiece and air motor lubricant. Frequent application of PANA SPRAY Plus will ensure handpiece and air motor performance and durability. Apply PANA SPRAY Plus every time before autoclaving any handpiece or air motor. Adapters available for all handpiece brands.

ORDER CODE (PK OF 6)
Y900630G

CARE & MAINTENANCE INSTRUCTIONS

1. PREPARATION

- Remove handpiece from tubing
- Remove bur
- Do not submerge handpiece in any solution

2A. AUTOMATIC CLEANING AND DISINFECTION USING A THERMO/WASHER DISINFECTOR

- Always ensure that handpieces are placed on the correct adaptors
- Cleaning agent pH level must be between 2.5-10.5
- Rinse cycle must be activated
- OR** (if automatic method is not available see 2b below)

2B. MANUAL CLEANING USING TAP WATER, BRUSHES AND CLOTHS

- Clean handpiece under cold or tepid running water

3. INSPECT

- Inspect handpieces for debris and repeat above process if necessary

4. DRYING

- The drying procedure is normally part of the cleaning programme of the thermo/washer disinfectant alternatively dry manually using a tissue

5A. AUTOMATIC LUBRICATION USING NSK iCARE

- Check machine is connected and working correctly
- Connect handpiece to correct port
- Select appropriate cycle (refer to NSK iCare user manual)
- Always lubricate straight handpieces with closed chuck and blanking piece inserted
- Always complete steps 2,3,4,5 in quick succession
- Lubricate the Chuck Mechanism by using the chuck cleaning function on the iCare

5B. MANUAL LUBRICATION USING NSK PANA SPRAY PLUS

- Select correct nozzle for handpiece (see list below)
- Shake spray can
- Keep spray can in upright position
- Insert nozzle into handpiece
- Always lubricate straight handpieces with closed chuck and blanking piece inserted
- Spray handpiece for 2-3 seconds holding a clean tissue over the head end
- Check tissue for debris and if oil is not running clean repeat process until handpiece is clean and free of debris
- Lubricate chuck mechanism using PANA SPRAY plus with tip nozzle weekly
- Always complete steps 2,3,4,5 in quick succession

PURGE OUT EXCESS LUBRICANT FROM THE HANDPIECE AFTER MANUAL LUBRICATION

6. PACKAGING

- Pack in accordance with current applicable standards/legislation if using a B or S type autoclave. If using an N type autoclave, pack **AFTER** sterilisation

7. STERILISATION

- NSK Handpieces are autoclavable up to 135°C. Always remove from autoclave as soon as cycle is complete

8. STORAGE

- Store handpieces protected from dust, dirt and microorganisms, ideally in an upright position (head up)
- Handpieces **MUST** be stored dry
- Always comply with expiry dates of sterilised items in accordance with current applicable standards/legislation

PANA SPRAY PLUS NOZZLES ALWAYS CHOOSE THE RIGHT ONE FOR YOUR HANDPIECE

KV Nozzle – Z090-051
For KaVo® MULTIflex Coupling

SR Nozzle – Z090-052
For Sirona® Quick Coupling

AUTOMATIC CLEANING AND LUBRICATION USING NSK ICARE IS SIMPLE

A.

Check oil level indicator light.
Add more oil if required (light
will come on when oil comes
down to 150ml or less).

B.

Open the door and connect
1, 2, 3 or 4 handpieces to the
correct handpiece adaptor.
Close the door (iCare will not
operate if the door is open).

S: Short / M: Middle / L: Long

C.

Select the desired purge
programme Mode.
By selecting the selection
button (1, 2 or 3), until the
mode light is illuminated.

- S Mode for High Speed handpieces (air turbines)
Cycle time 28 seconds
- S Mode for Blue band Low Speed handpieces and NSK heads
Cycle time 50 secs
- M (Middle) Mode for High Speed handpieces (air turbines)
Cycle time 30 seconds
- M (Middle) Mode for Blue band Low Speed handpieces
and NSK heads Cycle time 64 secs
- L (Long) Mode for High Speed handpieces (air turbines)
Cycle time 33 seconds
- L (Long) Mode for Blue band Low Speed handpieces
and NSK heads Cycle time 84 secs

D.

Press the 'Start' button.
The door should not be
opened until the cycle
is finished.

Melag Pro Line: Vacuclave 118 & 123

A PROfound leap of the world's best-selling autoclave

Do you know the world's best-selling autoclaves of the MELAG Pro-Class? Then you will love the new generation of MELAG devices - from the functions to the price! Because the affordable entry-level model of the Pro Line impresses all along the line:

With smart operating and documentation concepts as well as a modern and extremely robust design, the Pro Line autoclaves offer everything you need for the safe, convenient and resource-saving sterilisation.

Powerful class B vacuum process: Reliable sterilisation of up to 6 kg on 5 trays in only 15 to 27 minutes (plus timed drying).

Smart-Touch Display with LED status: Touchscreen with intuitive menu structure for easy operation just like your smartphone

Connectivity and data logging: Compliance with legal requirements by saving sterilisation parameters via USB stick or network*

Stand-alone concept: Integrated water tanks and highly effective air cooling for site-independent operation without cooling water

Power Save energy-saving mode: Heating and display go into standby mode between sterilisations for top energy efficiency*

EasyCare routine concept: User-friendly optimisations for efficient filter replacement, tank cleaning and water supply

Melag Prime Line: Vacuclave 318 & 323

The MELAG price-performance champion

Whether loading, sterilisation or documentation - the new Prime Line autoclaves offer a price-performance ratio that stands up any comparison:

So you not only sterilize more instruments in less time, but also save a lot of money. And all this in the MELAG quality - made in Germany, that you know and love from the proven predecessor models of the Pro-Class.

Class B sterilisation in the Heavy Duty program of even larger loading quantities: Powerful sterilisation of up to 8 kg on 5 trays in only 15 to 27 minutes (plus drying)

DRYtelligence drying: Algorithm-controlled process for optimum drying results while reducing drying time by up to 80%

Smart-Touch Display with LED status: Touchscreen with intuitive menu structure for easy operation just like your smartphone

ProControl Approval: Batch approval, user authentication and printing of barcode labels via MELAprint 80 directly on the display without extra software

Connectivity and data logging: Compliance with legal requirements by saving sterilisation parameters via USB stick or network

Stand-alone concept: Integrated water tanks and highly effective air cooling for site-independent operation without cooling water

Power Save energy-saving mode: Heating and display go into standby mode between sterilisations for top energy efficiency

EasyCare routine concept: User-friendly optimizations for efficient filter replacement, tank cleaning and water supply

Cliniclave® 45 Series

MELAG
competence in hygiene

Four models for the greatest-possible flexibility

Our experience from developing and manufacturing steam sterilisers for decades, paired with the innovation power of our 165 specialist engineers has resulted in an especially innovative and energy-efficient steam sterilisers: the Cliniclave® series. In addition to the typical MELAG features of record operating times, an intuitive operating concept and integrated documentation and approval, the four large steam sterilisers of this new range present a series of further unique innovations which only we as the specialists for instrument decontamination could deliver to our customers. The focus of the new Cliniclave® series lies on the combination of even shorter operating times and even faster instrument availability, whilst achieving considerable levels of energy efficiency.

The Cliniclave® series consists of large steam sterilisers with a capacity of one or two sterilisation units (StU), available as single-door or double-door (pass-through) models.

The three most important advantages of the Cliniclave series at a glance:

1. Save time: With a load quantity of up to 70kg, the steam sterilisers of the Cliniclave® series can sterilise significantly more instruments than other devices of their class, and achieve record operating times with low levels of water and energy consumption.

2. Work ergonomically: A wide range of batch configurations can be inserted and removed from the steam steriliser using the loading system (including loading trolley), thereby allowing ergonomic, quick and secure operation.

3. Document securely: The XXL colour-touch display enables intuitive operation. The integrated documentation and approval software permits complete reproducibility. Via the Ethernet interface the Cliniclave® series can be integrated in the practice or clinic network.

Cliniclave® 45 single-door version

Chamber: Ø 44cm x 72cm
Volume: 105 litres
Load: 35kg
Capacity: 1 sterilisation unit (1 StU)
Dimensions: W 65 x H 160 x D 91 cm

Cliniclave® 45 D single-door version

Chamber: Ø 44cm x 74cm deep
Volume: 110 litres
Load: 35kg
Capacity: 1 sterilisation unit (1 StU)
Dimensions: W 65 x H 160 x D 101 cm

Cliniclave® 45 single-door version

Chamber: Ø 44cm x 134cm
Volume: 200 litres
Load: 70kg
Capacity: 2 sterilisation units (1 StU)
Dimensions: W 65 x H 160 x D 153 cm

Cliniclave® 45 MD single-door version

Chamber: Ø 44cm x 136cm deep
Volume: 205 litres
Load: 70kg
Capacity: 2 sterilisation units (2 StU)
Dimensions: W 65 x H 160 x D 163 cm

MELAG
competence in hygiene

The MELAG washer-disinfector of the Evolution Series convinces with new unique innovations in addition to the proven product highlights of MELAtherm® 10. MELAtherm® 10 Evolution provides maximum performance and ease of use for an even more efficient instrument decontamination workflow.

MELAtherm® 10 Evolution sets new standards in operation: Its large **Smart-Touch Display** with helpful video tutorials facilitates intuitive operation. You retain full control even during the program cycle. The new **MELAconnect App** provides you with access to the device status and program progress from anywhere in your practice or clinic. Finally, take advantage of **ProControl** to perform a fast and paperless batch approval directly on the Smart-Touch Display.

The new **AquaBoost Technology** ensures optimal cleaning outcomes: AquaBoost achieves double rinsing pressure and up to 44 % better cleaning results at the same water consumption as MELAtherm® 10. The increased pressure permits the decontamination of even more instruments. The cleaning, disinfection and drying of 23 handpieces and instruments for up to 40 patients in only 60 minutes is possible only with MELAtherm® 10 Evolution.

**CALL FOR
PRICING**

Smart-Touch:

Operation and program selection are as easy as never before using the large Smart-Touch Display. Integrated video tutorials covering all relevant issues guarantee a self-explanatory operating concept.

ProControl:

Performing user authentication and batch approval directly on the device saves time and provides legal certainty.

AquaBoost:

The new high-performance circulation pump ensures a 44 % better cleaning outcome and greater capacities: Decontaminate up to 23 handpieces and turbines per cycle!

MELAconnect App:

Smart workflow in instrument decontamination: Monitor the device status and program progress at any time and from anywhere in your practice and clinic using the MELAG mobile app. The MELAconnect App provides even greater convenience: user manuals, video tutorials, troubleshooting and the seal check function ensure a perfect workflow.

Melag Premium Evolution

MELAG
competence in hygiene

The innovative Class B steam sterilizers for practice and clinic

The combination of MELAG expertise and experience with Class B steam sterilizers has produced something great: the new Premium-Class Evolution series.

The patented MELAG double jacket technology and DRYtelligence® intelligent drying of Vacuklav Premium-Class Evolution steam sterilizers enable record-breaking operating times.

Whatever the context in which the steam sterilizer is deployed, the Premium-Class Evolution series provides maximum reliability and flexibility. Whether with a fixed water connection or as a stand-alone solution, they are suitable for any installation situation in a practice and clinic setting.

MELAG provides steam sterilizers of the Evolution series with different-sized sterilisation chambers to accommodate various types and quantities of instruments. Choose from a chamber depth of 35 cm or 45 cm for especially long instruments.

 Fixed water connection  35cm Sterilization chamber

Vacuklav 40 B+ Evolution

Setting the ultimate benchmark: the innovative product features of the high-performance Vacuklav 40 B+ Evolution steam sterilizer with its fixed water connection produces reliable and very fast process times to ensure the highest of quality.

 Stand-alone  35cm Sterilization chamber

Vacuklav 41 B+ Evolution

Our patented double-jacket technology brings record-breaking operating times. Vacuklav 41 B+ Evolution is a high-performance stand-alone steam sterilizer with an efficient cooling system and DRYtelligence intelligent drying.

 Stand-alone  45cm Sterilization chamber

Vacuklav 43 B+ Evolution

Vacuklav 43 B+ Evolution provides record-breaking operating times, even with maximum loading of its especially-large sterilization chamber. This is rounded off by our DRYtelligence which ensures the best-possible drying outcome.

 Fixed water connection  45cm Sterilization chamber

Vacuklav 44 B+ Evolution

Innovation and volume. With a chamber depth of 45 cm, the combination of the patented double jacket technology and DRYtelligence, Vacuklav 44 B+ Evolution ensures reliable sterilization of up to 9 kg of instruments in the shortest possible time.

Product codes:

- MEL-ME10080 (18L Vacuklav 40 B+ Evolution, Fixed water connection for RO)
- MEL-ME10081 (18L Vacuklav 41 B+ Evolution, No water connection/Stand-alone)
- MEL-ME10083 (22L Vacuklav 43 B+ Evolution, No water connection/Stand-alone)
- MEL-ME10084 (22L Vacuklav 44 B+ Evolution, Fixed water connection for RO)

Melag Pro-Class

The high-performance Class B steam sterilisers from MELAG

The reliability, fast sterilisation cycle times and large volumes provided by the Pro-Class autoclaves produce entirely convincing results: The tried-and-tested quality has established the Pro-Class series as the most-sold Class B autoclave of their class.

Class B Pro-Class autoclaves are available in a wide range of models. The variety of the chamber sizes - choose from **17 litres, 22 litres and even 29 litres** - ensures efficient and safe steam sterilisation.

With a **60 cm chamber depth**, Vacuklav 24 BL+ permits the sterilisation of especially long instruments such as endoscopes.

Available as both a **fixed water and stand-alone** solution, Pro-Class autoclaves can be deployed in a range of installation situations: The integrated water tank of the stand-alone devices means that they can be installed anywhere in the decontamination room irrespective of the location of the water connection.

The stand-alone and the fixed water autoclaves can also be connected to the water supply (water connection set and a MELAdem water treatment unit required) to enable automatic operation.

Vacuklav 31 B+

Tried-and-tested reliability: with its short sterilization cycles, easy operation and practical documentation, Vacuklav 31 B+ is the energy-efficient solution for sterilization in a medical or dental practice and clinic.

 Stand-alone
  35cm Sterilization chamber

Vacuklav 23 B+

Reliable and stand-alone. The patented air-cooling system, quick operating times, deep sterilization chamber and versatile documentation solutions provided by Vacuklav 23 B+ make it the ideal all-round autoclave for practice and clinic use.

 Stand-alone
  45cm Sterilization chamber

Vacuklav 24 BL+

The especially deep chamber is ideal for extra-long instruments. The 60 cm deep chamber makes the Vacuklav 24 BL+ autoclave ideally suited to reliable and fast sterilization of endoscopes and accessories.

 Fixed water connection
  60cm Sterilization chamber

Product codes:

MEL-ME10051 - (18L Vacuklav 31 B+ Evolution, No water connection/Stand-alone)

MEL-ME10053 - (22L Vacuklav 23 B+ Evolution, No water connection/Stand-alone)

MEL-ME10052 - (29L Vacuklav 24 BL+ Evolution, Fixed water connection for RO)

The product highlights

Performance

High loading capacities and quick sterilization times enable efficient workflows.

Safety

The integrated documentation interface provides maximum process reliability.

Flexibility

Benefit from our wide range of products and choose between devices with three chamber depths as a fixed water or stand-alone unit.

User-friendliness

The MELAG 4-key concept and our digital tools make for an intuitive operating concept.

Melag Vacuklav 550

MELAG
competence in hygiene

Turn 2 into 1 - Compared to two alternative small autoclaves, Vacuclave 550 ensures significantly more capacity with a 40 % smaller footprint. Sterilize the maximum number of instruments in the minimum amount of space in record time.

Thanks to the extra-large chamber and pioneering innovations, you'll be ready for all tasks with Vacuclave 550: Discover the advantages of our new 50 liter autoclave for energy-efficient, time- and cost-saving sterilisation of your instruments:

- Outstanding capacity: More space for a load of up to 25 kg on 16 trays or up to 10 MELAstore Boxes
- Impressive speed: Patented Double Jacket Technology for record operating times
- Intelligent drying: Shortening the drying time with DRYtelligence by up to 80 %
- Uncompromising comfort: Extra-large Smart-Touch Display for intuitive operation as simple as your smartphone
- Traceable documentation: Documentation and approval directly on the device with ProControl
- Pioneering technologies: Recovery, Coolify, Power Save and DRYtelligence make Vacuclave 550 the cleanest solution - for your budget and the environment!

Hygoclave 40

Class B steam steriliser designed to meet the highest professional requirements

In order for sterilisation equipment to really make a difference in demanding day-to-day practice, it needs to deliver outstanding strengths in all key areas. This includes ensuring reliable sterilisation results and offering a combination of genuinely user-friendly operation, exceptional efficiency and high reliability. With the Class B Hygoclave 40, Durr Dental meets the highest professional requirements for sterilisation cycles and thus provides a cost-effective basis for successful day-to-day working.

- Reliability thanks to a flexible, high-performance drying system
- Integrated fresh water quality testing
- Simple loading and unloading with a motorised door
- 5" high-resolution colour touch screen
- Elegant, functional design

Product codes:
DUR-HG40+
DUR-HG40

Hygoclave 50

Increased comfort for maximum efficiency

The Hygoclave 50 is our latest new development in this area. Its DNA makes it a reliable link in the practice's hygiene chain. Here, absolute reliability and consistent sterilisation results to the highest standards are what counts. With Hygoclave 50, Durr Dental offers dental practices a professional Class B solution that combines impressive performance with a well thought-out operating concept – for maximum efficiency and exceptional user friendliness designed to cope effortlessly with tough day-to-day working environments.

- High-performance sterilisation and drying system
- Excellent usability thanks to:
 - High-resolution 5" touch screen
 - Automatic door locking mechanism
 - Flexible fresh water supply
- Extra universal programme for additional safety even when sterilising complex hollow bodies
- Integrated water quality test
- Everything in view and documented thanks to connection to the practice network and dental documentation programmes

Product codes:
DUR-HG50+
DUR-HG50

HygoPrint Easy

The optionally available printer offers the possibility to print cycle protocols as well as barcode labels. These contain all the required information on sterilisation cycles completed.

Enbio Pro & Enbio S

enbio®

Enbio sterilisers are up to 6 times smaller and 3 times lighter than a typical class-B / vacuum autoclave. But when it comes to work efficiency, they keep up the pace.

Superfast sterilisation

Up to 4 times faster cycle time than the typical autoclave.

Perfectly dry pouches in no time

Enbio S sterilises a load of wrapped instruments in just 15 minutes (Enbio Pro – 18 minutes).

Emergency sterilisation

In case of emergency, you can sterilise unwrapped instruments for immediate use in just 7 minutes.

Simple

Enbio is so simple to install and operate that it takes longer to explain how simple it is.

Inaudibly silent

Enbio autoclaves work unbelievably silent. Wherever you use it, nobody will notice it's working.

Enbio Magic Filter: forget about water

Imagine a race car covering a long distance on a teaspoon of fuel. Enbio autoclaves are like that. With Enbio Magic Filter as a standard equipment, they can run up to 1000 processes on just 1 litre of demineralised water. No tap or sink required.

Enbio S. Speedmaster.

Enbio S is compact to fit even a cramped space. Unbelievably short process times will save your procedure in emergency, or allow sterilisation of the instruments as you go, between patients.

Enbio PRO. Small foot. Big space.

Enbio PRO is an ideal solution as a basic workhorse in a small practice. Superfast sterilisation and room to hold most of the instruments, including popular implant cassettes.

3D Printing Solutions For Dental Practices

Form Wash & Form Cure

The Perfect Finish, Every Time

Produce parts you'll be proud to deliver with a tried and tested, start-to-finish dental 3D printing workflow that's certified biocompatible. All stereolithography 3D prints require rinsing and post-curing to remove uncured resin and achieve peak quality. Our automated solutions make post-processing simple.

Product codes:

FH-WA-01.sp.sp – (Form Wash)

FH-CU-01.s0.sp – (Form Cure)

1. PRINT

Print your parts in just a few clicks with Formlabs 3D printers.

2. WASH

Insert the build platform directly into Form Wash after printing for a consistent, automatic rinse.

3. CURE

Transfer the part to our automated post-curing station, Form Cure, and cure using our recommended settings.

4. DONE

Parts are ready to deliver.

3D Printing Solutions For Dental Practices

Form Auto

Automation Hardware for Your Dental 3D Printer

Form Auto is a hardware extension for the Form 3B/3B+ that automatically removes finished parts from the Build Platform 2 and starts the next print without the need for operator interaction, enabling 24/7 printing with no downtime.

Always available, ready, and always printing.

Product code:
FA-F3-01 - (Form Auto)

FORMLABS AUTOMATION ECOSYSTEM

Reach new levels of productivity with an automated 3D printer fleet that you can operate from anywhere. Skyrocket your ability to produce high-quality, affordable parts through 24/7 back-to-back production without any operator interaction. Automatically operate your fleet to eliminate idle printer time with easy-to-implement solutions including Form Auto, Fleet Control, and the High Volume Resin System.

A NEW ALL IN ONE waterproof glass keyboard – great for infection control

Distributed by:
ICONA
DESIGNED WITH YOU IN MIND

The new medical waterproof keyboard for all health professionals

- 3 modes of connectivity available – USB, RF and Bluetooth.
- Connect to PCs, tablets and smartphones.
- Keyboard supports Android, Windows and MAC OSX
- The numeric key pad can be switched to mouse pad mode.
- Keypad buttons have adjustable volume and vibration control
- Tempered glass surface is easily wiped over and cleaned

The Robert-Koch Institute states:

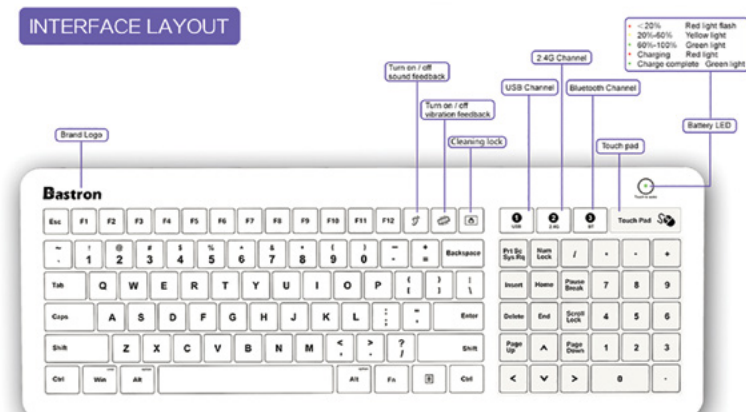

“Because of their mechanical construction, conventional keyboards cannot be disinfected.”

And recommends:

Keyboards with “smooth, liquid-proof and disinfectible surfaces” are recommended for hospitals and doctor’s offices.

Power Vibrator

- Designed for easy pouring of plaster
- Prevents blisters by minute vibration
- Easy detachability of rubber sheet vibration table
- Variable vibration control

QUALITY
KOREAN
PRODUCT WITH
12 MONTH
WARRANTY

12 Months
Warranty

Product Code: 080030

Lathe

- Polish and grind metals and resins - dry or wet
- Safety switch to prevent accidental start-up after power failures, thus removing any risk of injury.
- 'Lever' type extractors for simpler brush-holder removal.
- Robust, heavy construction with wide base on non-slip rubber feet for maximum stability and steadiness.

Product Code: M-080162

Plaster Separator

- With sealed 4-chamber clarification system
- No unpleasant odours
- No spillage
- Easy to clean

12 Months
Warranty

Product Code: 080087

Sand Blaster

- Precise blasting with the special mixing chamber technology
- Can be extended to 2 tanks without the use of tools.
- Increased efficiency with tank selection switch inside the blasting chamber.

Product Code: 080262

Model Trimmers

Powerful RH3 Model Trimmer with Diamond Wheel - RPM 3000

Product Code: M-080083

Micro-Etcher IIA

Product Code: DAN65-050

Erio Lab Desk – Sole 1 & Sole 2

Single-place and two-place workstations with height adjustment from a minimum of 86cm (from the floor to the worktop) to a maximum of 100cm.

They are supplied with two drawers with plastic trays for each workstation and with a service drawer unit with three drawers, one with lock.

The gas system, the air gun, the micromotor housing and four electric sockets (six on the two-place table) are always provided.

The worktop is made of plastic laminate. They can be supplied with accessories on request.

Product Code: SOLE1
Dimensions: 1100mm x 50mm x 600mm

Product Code: SOLE2
Dimensions: 1720mm x 50mm x 600mm

How to Adjust and Wear Loupes

Interpupillary Adjustment.
This adjustment is controlled by turning the interpupillary adjustment knob back and forth, until the image converges into a circle.

Adjust the hinge mechanism so that the optics are angled approximately 30 to 45 degrees below a horizontal line. This will allow for the user to look down into the optics while working, keeping an upright posture.

Most loupes have a preset working distance. Be sure to position yourself back and forth to find the optimal distance for your focusing. Adjust the head-band to wear them comfortably.

How to Choose Quality Loupes

The best method to evaluate loupes is to look at an object with straight black lines, as above Figure A. The most common signs of poor quality loupes are low resolution, chromatic aberration and spherical aberration.

Chromatic aberration refers to color distortion. Because each color has a different wavelength, uncorrected optics cause the various wavelengths to focus at different points in space. The first color that generally comes out of focus is blue; when looking at black lines on white paper, poor quality loupes will display a blue haze just to the side of the black lines, as depicted in Figure B. Spherical aberration is stated to be the flatness of the image.

When viewed through loupes, an object that exhibits spherical aberrations would appear to be curved or spherical, as depicted in Figure B. The lines would not be straight as they should be, as in the original (Fig. A) or as a Gritter loupe image example like Figure C.

A simple piece of graph paper, can best reveal the difference between mediocre and high quality loupes, better than complex objects like models. Other important considerations are light transmission, depth of field and field of view.

Light transmission is important not only for quality of the image, but also for the comfort and safety of your patients. Optimised light transmission means that you can work with less light, reducing your eyestrain while minimizing the exposure of your patient to bright light.

Depth of field is defined as the range that's in focus away from and towards you without moving your head. The ergonomic benefits, or how comfortable the loupes are to wear, of a large depth of field are clear because there is less need to move your back and neck to work effectively.

Field of view refers to the amount of the original object that you can see at one time. Different applications have different needs. A bigger field of view is not always the better choice; for instance, an endodontist might prefer to see only the area of focus, whereas a periodontist would like to see as much of the surrounding area as possible.

2.5x Galilean Loupes - Titanium Sports Frames

	Code	Product	Features
	TA.25P2-S	2.5x Galilean 340mm	2.5x Galilean Loupes - 380mm Working Distance - 60-80mm Depth of View - 120mm Field of View - Weight 50 grams <i>With titanium Sports frames .</i>

Leica M320 D Dental Microscope

With Integrated 4K Camera

Enjoy better visualisation during surgical and non surgical dental procedures, benefit from increased physical comfort, and show your expertise to peers and patients with astounding 4K images.

Inspired by dentists - With the M320 dental microscope you can achieve better treatment results and optimise outcomes through high precision microdentistry. To help you share your expertise with patients and peers you can record your procedures in impressive 4K image and video quality.

Developed for dentists - The ergonomic microscope design of the M320 enhances your physical comfort and thus increases efficiency in different fields including restorative dentistry, endodontics, prosthodontics and aesthetic dentistry as well as periodontics and implantology.

Not all products or services are approved or offered in every market and approved labeling and instructions may vary between countries.

PHYSICAL COMFORT INCREASES EFFICIENCY

Ensure you are sitting comfortably so that you can work without interruptions for repositioning yourself. Leica Microsystems offers a choice of objective lenses, binocular tubes, and ergonomic accessories that suit your body frame, specialty, and working preference.

Binocular tube with 45° angle

Work in comfortable standard position with a fixed 45° viewing angle

ErgoWedge for the 45° binoculars

Enjoy working more ergonomically with a tiltable viewing angle of 5–25°

Binocular tube for 180° movement

Enhance comfort and flexibility through an even wider range of viewing angles

ErgonOptic Dent accessory

Extends the reach of the microscope and allows to swivel the optics carrier to any angle

Ultra-low binoculars for an upright posture

Work in a more compact position with your body and arms closer to the operating field
