U-E3V20200312

Not only with advanced technologies but also equipped with comprehensive accessories, E3V is made to optimize animals' examinations for all veterinarians. As a portable veterinary ultrasound device, E3V raises the bar on image quality and enables convenient ultrasound scanning process. To satisfy predictable veterinary applications, E3V is an ideal choice for its versatile exam modes and specialty presets.

With advanced technologies, brilliant image quality and optimized workflow, E3V satisfies your needs in any condition.

Clinically proven technologies provide abundant details for diagnosis

Patient information management specifically designed for veterinary uses

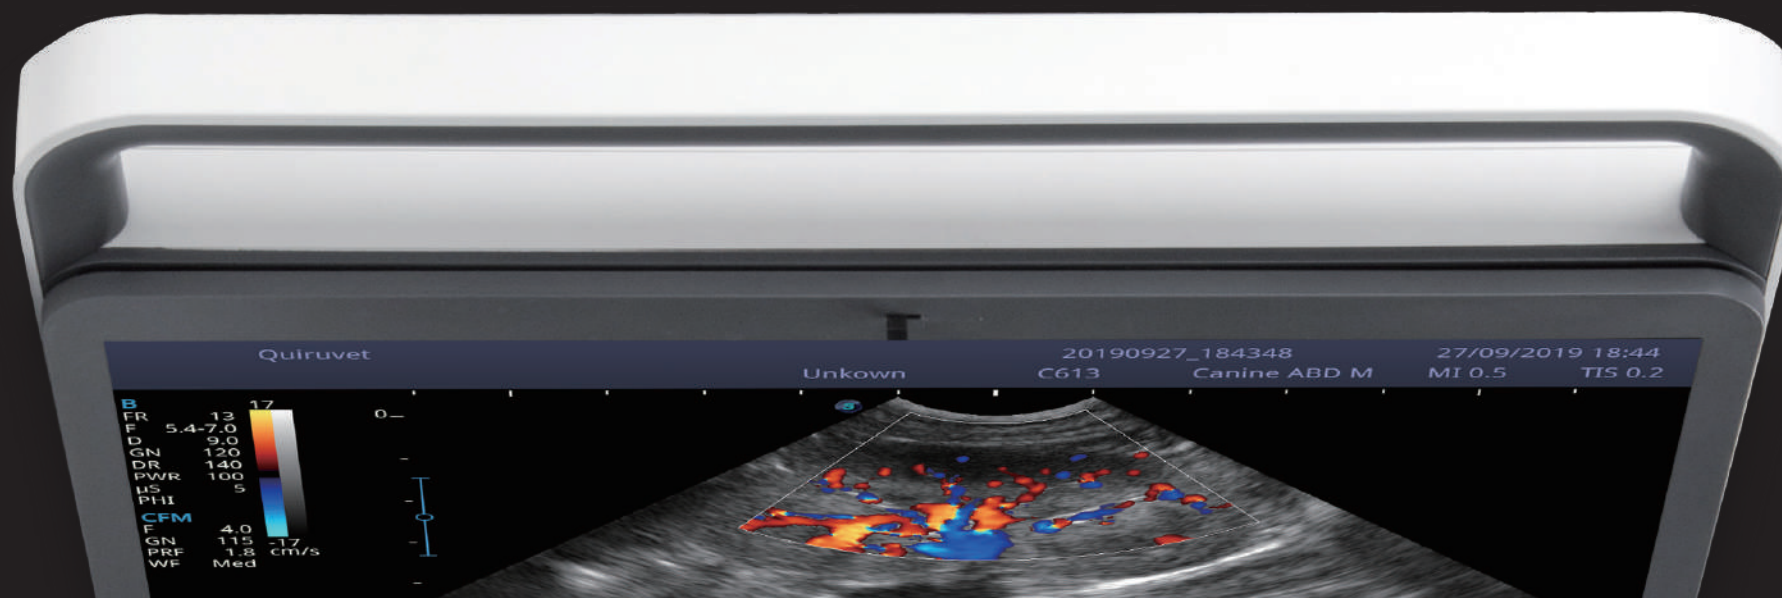

Specialized calculation and intelligent measurements improve working efficiency

User-definable graphic exam modes take in animals of all kind

Full range of transducers are available for different applications

μ-scan

Reduces noises while preserving excellent detailed resolution

SR Flow technology

Presents vivid blood flow and more details of tiny vessels

Continuous Wave Doppler

Offers more information on heart exam functions

Anatomic M mode imaging technology

Improves quantification of cardiac dimensions

Color M mode imaging technology

Improves cardiac examination efficiency

Tissue Doppler Imaging

Enhanced cardiac evaluation technology

Quick boot up

Less waiting time and more time for examinations

Specialty transducers for veterinary

Wide frequency range and longer probe cables specifically designed for veterinary uses

Auto brightness adjustment screen

Shows clearer images and easy on the eyes

Inclinal monitor with wider viewing angles

Adapts to every working scenario

Splash resistant and dust proof keyboard film

Extremely welcome in animal examination rooms

Large capacity battery

Brings you stable scanning process up to 3 hours

Comprehensive Transducers

As the first company engineered both medical ultrasound units and transducers in China, SonoScape offers a broad range of transducers for E3V, helps to provide exceptional image quality in animal care.

L741
Linear probe
• 4-16 MHz
• Small parts
• High res. abdominal

10I2
Intraoperative probe
• 4-16 MHz
• Ophthalmology
• Superficial

3C-A
Convex probe
• 1-7 MHz
• Abdominal
• Reproduction
• MSK

C613
Micro-convex probe
• 4-13 MHz
• Abdominal
• Cardiac
• Ovum pick-up

C322V
Micro-convex probe
• 2-7 MHz
• Cardiac
• Abdominal

3P-A
Phased array probe
• 1-6 MHz
• Cardiac
• Abdominal

7P-B
High frequency phased array probe
• 2-9 MHz
• Small animal
• Cardiac

L741V
Linear transrectal probe
• 4-16 MHz
• Reproduction
• Large animal
