SOPROCARE Intraoral Camera

The SOPROCARE concept was developed to assist the dental professional during prophylaxis and periodontal treatment in the dental office. SOPROCARE reveals caries in CARIO mode, as well as new and old dental plaque in PERIO mode. SOPROCARE is the first product on the market to reveal gingival inflammation. In DAYLIGHT mode, SOPROCARE can also be used as a camera, providing all of the necessary tools to perform a complete and time efficient oral examination.

**Under Perio mode,
it differentiates the
colour of tissue and
